**Daily Graphic** Ransford Tetteh, 2014-09-19      **ICTES 2018** Robbi Rahim, Kadek Suranata, Ifdil Ifdil, Itsar Bolo Rangka, 2019-03-13 The technical program of The First ICTES 2018 consisted of 114 full papers. Aside from the high quality technical paper presentations, we also held a workshop and clinic manuscript that was carried out before the main track aims to strengthen the ability to write scientific publications. Coordination with the steering chairs, Dr Kadek Suranata, S Pd M Pd Kons, and the members of the organizing committee is essential for the success of the conference. We sincerely appreciate all the Advisory Boards for the constant support and guidance. It was also a great pleasure to work with such an excellent organizing committee team for their hard work in organizing and supporting the conference. In particular, the Scientific Committee led by Cand Dr Robbi Rahim M Kom have completed the peer review process of technical papers and made a high quality technical program. We are also grateful to Students Conference chairs were leading by Ida Ayu Made Diah Paramiswari for their support and all the authors who submitted their papers to the First ICTES 2018. We strongly believe that ICTES conference provides a good forum for all academicians, researchers, and practitioners to discuss all Educational science and technology aspects that are relevant to issues and challenge for sustainability in the 4th industrial revolution. We also expect that the future ICTES conference will be as successful and stimulating as indicated by the contributions presented in this volume.

### **Biometrics and Cryptography** Sudhakar Radhakrishnan, Carlos M. Travieso-Gonzalez, 2024-06-19

Cryptography has crept into everything from Web browsers and e mail programs to cell phones bank cards and cars Shortly we will see many new exciting applications for cryptography such as radio frequency identification RFID tags for anti counterfeiting As a consequence of the pervasiveness of crypto algorithms an increasing number of people must understand how they work and how they can be applied in practice This book addresses this issue by providing a comprehensive introduction to modern applied cryptography that is equally suited for students and practitioners in industry Much of the focus is on practical relevance by introducing most crypto algorithms that are used in modern real world applications In addition to crypto algorithms attention is also given to important cryptographic protocols modes of operation security services and key establishment techniques Timely topics include lightweight ciphers which are optimized for constrained applications In today s fast paced world security and convenience are paramount Biometrics the science of identifying individuals based on their unique physical or behavioral traits offers a solution that is both secure and convenient From

fingerprint scanners on smartphones to facial recognition software at airports biometrics is rapidly becoming an integral part of our daily lives But what exactly is biometrics and how does it work This book delves into the fascinating world of biometrics exploring its history applications and the latest technological advancements You ll discover how biometrics can be used to verify identity control access and even detect fraud Whether you re a security professional a technology enthusiast or simply curious about the future of personal identification this book is for you

**Integrating Human Factors Methods and Systems Thinking for Transport Analysis and Design** Gemma J. M. Read, Vanessa Beanland, Michael G. Lenné, Neville A. Stanton, Paul M. Salmon, 2017-07-26 Governments and road safety agencies around the world have either introduced or are considering safe system strategies a long overdue acknowledgement that different elements of the road system contribute to road safety outcomes Human factors approaches have a leading role here in both conceptualising the road system as a complex sociotechnical system and in providing practical approaches to support true systems based countermeasures This book illustrates the potential for integrating contemporary systems based human factors methods with modern day driving assessment methods such as vehicle instrumentation and driving simulation to understand and enhance performance in modern day road transport systems The book outlines why a fundamental paradigm shift is needed in the way these systems are designed and operated and illustrates how a wide range of accepted human factors approaches can be applied successfully to road transport to revolutionise the countermeasure design process The practical illustrations of these human factors methods are applied to a long standing road and rail safety issue rail level crossings where the road and rail systems intersect The final chapter of the book highlights the utility of the human factors approach to reducing road trauma and discusses future applications of the approach
