Selected Topics in Food Process Engineering Oscar A. Vega-Castro, Ricardo Simpson, María del Pilar Buera, Diana M. Granda-Restrepo, Cristian Camilo Villa Zabala, Magda I. Pinzón-Fandiño, Gustavo Fidel Gutiérrez-López, Gustavo Victor Barbosa-Cánovas, 2025-10-29 This text is based on the invited presentations at the XIII Ibero American Congress of Food Engineering CIBIA XIII which was held in Medellín Colombia in March 2022 Invited

presentations were delivered by renowned food engineers worldwide and covered the latest on classic and novel topics driving food process engineering. The selected topics are centered on how food process engineering is addressing new challenges related to technical, social, economic, and environmental realities. Selected Topics in Food Process Engineering covers important ground in current and future food processing, including Food engineering contributions to health, environment, and quality of life. The role of food engineering during pandemics, Modeling of food processes, Clean technologies for the processing and preservation of foods, Alternative thermal and nonthermal processes, challenges and opportunities to the food industry, Advances in the characterization of food properties, Nanotechnology in food processing, Starch digestion, Extraction processes in the food industry, Food factory of the future. This text serves as an inspirational tool for future research in food engineering and beyond as it promotes the well-being of the population in terms of adequate food supply by bridging engineering knowledge, the food chain, and the fourth industrial revolution.

Digital Health Alan Godfrey, Sam Stuart, 2021-07-06. Digital Health: Exploring Use and Integration of Wearables is the first book to show how and why engineering theory is used to solve real-world clinical applications, considering the knowledge and lessons gathered during many international projects. This book provides a pragmatic A to Z guide on the design, deployment, and use of wearable technologies for laboratory and remote patient assessment, aligning the shared interests of diverse professions to meet with a common goal of translating engineering theory to modern clinical practice. It offers multidisciplinary experiences to guide engineers where no clinical advice and expertise may be available. Entering the domain of wearables in healthcare is notoriously difficult as projects and ideas often fail to deliver due to the lack of clinical understanding, i.e., what do healthcare professionals and patients really need? This book provides engineers and computer scientists with the clinical guidance to ensure their novel work successfully translates to inform real-world clinical diagnosis, treatment, and management. Presents the first guide for wearable technologies in a multidisciplinary and translational manner. Helps engineers design real-world applications to help them better understand theory and drive pragmatic clinical solutions. Combines the expertise of engineers and clinicians in one go to guide accessible to all.

Environmentally Friendly and Biobased Lubricants Brajendra K. Sharma, Girma Biresaw, 2016-09-19. A Comprehensive Review of Developing Environmentally Friendly Lubricants. A push from environmentally savvy consumers along with recent changes in governmental regulations have paved the way for a marketplace of products with high levels of environmental performance. Fueled by the growing demand for biobased lubricants, Environmentally Friendly and Biobased Lubricants highlights the development of environmentally friendly additives that are compatible with environmental regulations and describes the approaches being used in this emerging area. Derived from research topics shared over the years at various technical sessions of the Society of Tribologists and Lubrication Engineers (STLE) Annual Meetings, the book includes a critical assessment of gaps and weaknesses in the field of environmentally friendly fluids and biobased lubricants. Each chapter is written by authors selected from the environmentally

friendly fluids and biobased lubricants sections of STLE and also incorporates input from prominent researchers invited to take part in the book. Expert contributors discuss the control, production, usage, and disposal of lubricants, factors in related policies, laws, and regulations around the world, and include case studies demonstrating the uses and values of commercially viable biobased lubricants. The book is divided into five sections that cover advanced environmentally friendly base oils and feedstocks, biobased hydraulic lubricants, and biodegradability; chemically/enzymatically modified environmentally friendly base oils; vegetable oil based environmentally friendly fluids and additives for environmentally friendly fluids. **Advanced Fitness Assessment and Exercise Prescription** Ann L. Gibson, Dale R. Wagner, Vivian H. Heyward, 2024-02-01. Advanced Fitness Assessment and Exercise Prescription, Ninth Edition, with HKPropel Online Video is the definitive resource for conducting physical fitness testing and customizing exercise programs. Now in its ninth edition, this comprehensive guide is fully updated with the latest research, the newest exercise testing and prescription guidelines, and the most up-to-date programming content. The text reflects the most recent exercise testing and prescription guidelines from the American College of Sports Medicine (ACSM) along with physical activity recommendations from the U.S. government and American Heart Association. It highlights ACSM guidelines for physical activity and exercise testing requirements to consider before beginning exercise programs. Combining important research with practical application of testing and prescription protocols, the ninth edition also features the following: A new full-color interior to provide more detail and understanding of concepts through photos and figures; New step-by-step assessment sidebars that make it easy to locate and refer to assessment procedures; Modern guidelines for usage of current technology to test and monitor physical activity; Demonstrations of many of the assessments and exercises provided in 73 video clips; Structured around the five physical fitness components: cardiorespiratory capacity, muscular fitness, body composition, flexibility, and balance. The text begins with an overview of physical activity, health, and chronic disease, including discussion of preliminary health screenings and risk classification. Readers will gain insight into field and laboratory assessments and testing protocols for each component, along with detailed information on properly administering the most common assessments. The 73 related video clips, delivered online through HKPropel, provide detailed instruction and demonstration for performing many of the assessments and exercises; these include functional movement assessment, pull-up and push-up testing, flywheel training, and more. Finally, readers will turn research into practice by understanding how to design personalized exercise prescription customized for each client based on individual assessment outcomes. Information on appropriate training methods and programming considerations are presented for each component of fitness. With an unparalleled depth of coverage and clearly outlined approach, *Advanced Fitness Assessment and Exercise Prescription* bridges the gap between research and practice for students and exercise professionals alike who are eager to increase their knowledge and skill in assessing elements of fitness and designing individualized exercise programs.
