### Test Description

Microsoft Word 2003 aims at evaluating the skill level of the test taker in navigating through Microsoft Word 2003 as well as their ability to complete several commonly used tasks. The Whole Test combines both the Normal and Power User tests.

Among the tasks included in the Microsoft Word 2003 Normal User test are: formatting a document, viewing a document, using tools, employing stylistic actions, creating tables, sorting data, and conducting mail merges. The Microsoft Word 2003 Power User test attempts to provide the basis for separating candidates who possess limited exposure to Microsoft Word 2003 with those who are conversant with the full functionality of the software. Advanced Formatting, Auto Text, Templates, Tables, and Toolbars are among some of the topics addressed in this examination. This test is designed to assess candidates who will be required to use some of the more advanced features of the program on a daily basis. ....

Tests for Microsoft Excel 2003 and Microsoft Project 2002 are also available.
