A Health Care Provider's Guide to HIPAA FR&R Healthcare Consulting, Schiff, Hardin & Waite, 2002 **Easy Guide to HIPAA Risk Assessments** Lori-Ann Rickard, Lauren Sullivan, 2015-12-10 Risk assessments are required under the Health Insurance and Accountability Act of 1996 better known as HIPAA. HIPAA is the federal statute that requires healthcare providers to safeguard patient identities, medical records, and protected health information (PHI). It further requires organizations that handle PHI to regularly review the administrative, physical, and technical safeguards they have in place. Basically, HIPAA took established confidentiality healthcare practices of physicians and healthcare providers to protect patients' information and made it law. Risk assessments are a key requirement of complying with HIPAA. Covered entities must complete a HIPAA risk assessment to determine their risks and protect their PHI from breaches and unauthorized access to protected information. There are many components of risk assessments which can often seem burdensome on healthcare providers. Let Lori Ann Rickard and Lauren Sullivan guide you and your company as you tackle the risk assessments required by HIPAA.

A Mental Health Provider's Guide to Telehealth Jonathan G. Perle, 2021-03-31 This book works as a guide to videoconferencing practice for psychological providers through a broad, simplified, and practical overview of pertinent factors. It is a consolidation of research literature and professional experiences of practicing teaching and studying videoconferencing. It begins by defining key concepts such as telehealth, telepsychology, and other related terminology and examining the role of telehealth in addressing ongoing mental health disparities. An overview of existing videoconferencing practices, guidebooks, and general recommendations, as well as specifics of ethical and legal factors, are discussed. The book then details numerous essential factors of videoconferencing practice that are directly applicable to psychological care, including considerations of computer system, video camera, display screen, microphone, videoconferencing platform, bandwidth, and latency, and room setup, along with self-care practices. The appendices provide readers with links to resources, checklists, and other documents to guide their practice. Psychologists, counselors, and other mental health providers will find this user-friendly research-informed guide indispensable when implementing online treatment and teletherapy.
