Greek and Roman biography, 1861      Changes and Innovations in Social Systems Sarka Hoskova-Mayerova, Cristina Flaut, Daniel Flaut, Pavlina Rackova, 2025-05-13 This book presents challenges and innovations in social problems over the centuries. By their nature, human beings are innovative and continuously adapted to appeared changes over the time. From this point of view, human history can be considered as the story of all changes and innovations which have drastically influenced our way of life. Changes and innovations are normal things in the way of adaptation and are necessary conditions for survival along the time. Changes and innovations are hard and long term processes. Any progress in history is the result of changes and innovations. To innovate, changes are required in the culture, in the education, in the way of working, in the way of think etc. In the same time, innovations imply changes and changes usually generate reactions. Innovations are always oriented to the future and in turn imply changes. From here, the race of evolution was born. Changes require effort, generate resistance, but in the same time increase performance in almost all domains and increase vision and leadership, therefore the progress is obtained. To grow up as a field and provide changes, innovations need to present its theoretical foundations which make sense of the domains on which they are applied. To emphasize the above aspects, the proposed book presents some aspects regarding, but not only limited to, computer science, new theoretical and practical applications, mathematics, mathematical models, all mathematical results which can improve or are inspired from another known results, some aspects regarding history of mathematics etc, education etc. The chapters of the book present the state of arts of the chosen subjects from its beginning, its developments and its applications, by emphasizing the connection with the application or model that the authors have chosen for the presentation.      *Formal Methods for Protocol Engineering and Distributed Systems* Jianping Wu, Samuel T. Chanson, Quiang Gao, 2013-06-05 Formal Methods for Protocol Engineering and Distributed Systems addresses formal description techniques, FDTs applicable to distributed systems and communication protocols. It aims to present the state of the art in theory, application tools, an industrialization of FDTs. Among the important features presented are FDT based system and protocol engineering, FDT application to distributed systems, Protocol engineering, Practical experience and case studies. Formal Methods for Protocol Engineering and Distributed Systems contains the proceedings of the Joint International Conference on Formal Description Techniques for Distributed Systems and Communication Protocols and Protocol Specification, Testing and Verification, which was sponsored by the International Federation for Information Processing (IFIP) and was held in Beijing, China, in October 1999. This volume is suitable as a secondary text for a graduate level course on Distributed Systems or Communications and as a reference for researchers and industry practitioners.      *Technical Data Digest*, 1950-07      *The SIAM 100-Digit Challenge* Folkmar Bornemann, Dirk Laurie, Stan Wagon, Jörg Waldvogel, 2004-01-01 Gives concrete examples of how to justify the validity of every single digit of a numerical answer.
