Questioning Causality Rom Harré, Fathali M. Moghaddam, 2016-01-25. Covering a topic applicable to fields ranging from education to health care to psychology, this book provides a broad critical analysis of the assumptions that researchers and practitioners have about causation and explains how readers can improve their thinking about causation. In virtually every laboratory research center or classroom focused on the social or physical sciences today, the concept of causation is a core issue to be questioned, tested and determined. Even debates in unrelated areas such as biology, law and philosophy often focus on causality. What made that happen? In this book, experts from across disciplines adopt a reader-friendly approach to reconsider this age-old question in a modern light, defining different kinds of causation and examining how causes and consequences are framed and approached in a particular field. Each chapter uses applied examples to illustrate key points in an accessible manner. The contributors to this work supply a coherent critical analysis of the assumptions researchers and practitioners hold about causation and explain how such thinking about causation can be improved. Collectively, the coverage is broad, providing readers with a fuller picture of research in social contexts. Beyond providing insightful description and thought-provoking questioning of causation in different research areas, the book applies analysis of data in order to point the way to smarter, more efficient practices. Consequently, both practitioners and researchers will benefit from this book. *Handbook of Drug Interactions* Ashraf Mozayani, Lionel Raymon, 2003-10-15. Environmental and social pharmacological issues are also addressed in chapters on food and alcohol drug interactions, nicotine and tobacco and anabolic doping agents. Comprehensive and easy to use. *Handbook of Drug Interactions: A Clinical and Forensic Guide* provides physicians with all the information needed to avoid prescribing drugs with undesirable interactions and toxicologists with all the data necessary to interpret possible interactions between drugs found simultaneously in patient samples.

Economic Foundations for Creative Ageing Policy Andrzej Klimczuk, 2015-08-12. Ageing populations are a major consideration for socio-economic development in the early twenty-first century. This demographic change is mainly seen as a threat rather than as an opportunity to improve the quality of human life, especially in Europe where ageing has resulted in a reduction in economic competitiveness. *Economic Foundations for Creative Ageing Policy* mixes the silver economy, the creative economy and the social economy to construct positive solutions for an ageing population. Klimczuk covers theoretical analyses and case study descriptions of good practices to suggest strategies that could be internationally popularized.
