Stochastic Population Dynamics in Ecology and Conservation Russell Lande, Steinar Engen, Bernt-Erik Sæther, 2003 All populations fluctuate stochastically creating a risk of extinction that does not exist in deterministic models with fundamental consequences for both pure and applied ecology This book provides the most comprehensive introduction to stochastic population dynamics combining classical background material with a variety of modern approaches including new and previously unpublished results by the authors illustrated with examples from bird and mammal populations and insect communities Demographic and environmental stochasticity are introduced with statistical methods for estimating them from field data The long run growth rate of a population is explained and extended to include age structure with both demographic and environmental stochasticity Diffusion approximations facilitate the analysis of extinction dynamics and the duration of the final decline Methods are developed for estimating delayed density dependence from population time series using life history data Metapopulation viability and the spatial scale of population fluctuations and extinction risk are analyzed Stochastic dynamics and statistical uncertainty in population parameters are incorporated in Population Viability Analysis and strategies for sustainable harvesting Statistics of species diversity measures and species abundance distributions are described with implications for rapid assessments of biodiversity and methods are developed for partitioning species diversity into additive components Analysis of the stochastic dynamics of a tropical butterfly community in space and time indicates that most of the variance in the species abundance distribution is due to ecological heterogeneity among species so that real communities are far from neutral

In Their Own Words William D. Hayes Ed.D., 2009-08 In today's American college classrooms more and more international students are enrolling at a rapid pace This happened in my classroom several years ago I had taught for over twenty years at the time but I did not know how to approach these students who possessed varying levels of English proficiency My traditional methods did not work and all I could do was speak louder as if an increased volume would increase their learning Because I considered teaching a vocation I did not want to give up Instead I enrolled in a doctoral program in Adult Education and chose Teaching English as a Second Language as my Cognate In one of my doctoral classes I had to do a research project I decided to conduct interviews with my new students and simply ask them how they preferred to learn how to speak and write in English The results fascinated me Based on what they told me and what I found in the literature I totally revamped my composition classes Gone were the days of lecture Instead with student input I created a film based approach to teaching writing that seemed to emancipate my students and they became proficient writers of English Along the way I

was emancipated too and I knew that my classes would never be the same This book is a result of my experience and I hope it can be used as a jumping off point for positive change for any college composition teacher who truly cares if their students learn
