Opm Test Study Guide 2015:

IT Project Management: A Geek's Guide to Leadership Byron A. Love, 2016-10-04 This book's author Byron Love admits proudly to being an IT geek. However, he had found that being an IT geek was limiting his career path and his effectiveness. During a career of more than 31 years, he has made the transition from geek to geek leader. He hopes this book helps other geeks do the same. This book addresses leadership issues in the IT industry to help IT practitioners lead from the lowest level. Unlike other leadership books that provide a one-size-fits-all approach to leadership, this book focuses on the unique challenges that IT practitioners face. IT project managers may manage processes and technologies, but people must be led. The IT industry attracts people who think in logical ways, analytical types who have a propensity to place more emphasis on tasks and technology than on people. This has led to leadership challenges such as poor communication, poor relationship management, and poor stakeholder engagement. Critical IT projects and programs have failed because IT leaders neglect the people component of people, process, and technology. Communications skills are key to leadership. This book features an in-depth discussion of the communications cycle and emotional intelligence, providing geek leaders with tools to improve their understanding of others and to help others understand them. To transform a geek into a geek leader, this book also discusses self-leadership skills so geek leaders know how to lead others by leading themselves first. Followership and how to cultivate it among team members. How a geek leader's ability to navigate disparate social styles leads to greater credibility and influence. Integrating leadership into project management processes. The book concludes with a case study to show how to put leadership principles and practices into action and how an IT geek can transform into an effective IT geek leader.

A Hetero-functional Graph Theory for Modeling Interdependent Smart City Infrastructure Wester C. H. Schoonenberg,Inas S. Khayal,Amro M. Farid,2018-11-30 Cities have always played a prominent role in the prosperity of civilization Indeed every great civilization we can think of is associated with the prominence of one or more thriving cities And so understanding cities their inhabitants their institutions their infrastructure what they are and how they work independently and together is of fundamental importance to our collective growth as a human civilization Furthermore the 21st century smart city as a result global climate change and large scale urbanization will emerge as a societal grand challenge This book focuses on the role of interdependent infrastructure systems in such smart cities especially as it relates to timely and poignant questions about resilience and sustainability In particular the goal of this book is to present in one volume a consistent Hetero Functional Graph Theoretic HFGT treatment of interdependent smart city infrastructures as an overarching application domain of engineering systems This work may be contrasted to the growing literature on multi layer networks which despite significant theoretical advances in recent years has modeling limitations that prevent their real world application to interdependent smart city infrastructures of arbitrary topology In contrast this book demonstrates that HFGT can be applied extensibly to an arbitrary number of arbitrarily connected topologies of interdependent smart city infrastructures It also integrates for the first time all six matrices of HFGT in a single system adjacency matrix The book makes every effort to be accessible to a broad audience of infrastructure system practitioners and researchers e g electric

power system planners transportation engineers and hydrologists etc Consequently the book has extensively visualized the graph theoretic concepts for greater intuition and clarity Nevertheless the book does require a common methodological base of its readers and directs itself to the Model Based Systems Engineering MBSE community and the Network Science Community NSC To the MBSE community we hope that HFGT will be accepted as a quantification of many of the structural concepts found in model based systems engineering languages like SysML To the NSC we hope to present a new view as how to construct graphs with fundamentally different meaning and insight Finally it is our hope that HFGT serves to overcome many of the theoretical and modeling limitations that have hindered our ability to systematically understand the structure and function of smart cities Information and Software Technologies Giedre Dregvaite,Robertas Damasevicius,2015-10-13 This book constitutes the refereed proceedings of the 21th International Conference on Information and Software Technologies ICIST 2015 held in Druskininkai Lithuania in October 2015 The 51 papers presented were carefully reviewed and selected from 125 submissions The papers are organized in topical sections on information systems business intelligence for information and software systems software engineering information technology applications Informing Social Security's Process for Financial Capability Determination National Academies of Sciences, Engineering, and Medicine,Institute of Medicine,Board on the Health of Select Populations,Committee to Evaluate the Social Security Administration's Capability Determination Process for Adult Beneficiaries,2016-06-20 The U S Social Security Administration SSA provides benefits to disabled adults and children offering vital financial support to more than 19 million disabled Americans Of that group approximately 5.5 million have been deemed by virtue of youth or mental or physical impairment incapable of managing or directing the management of their benefits Hence a representative payee has been appointed to receive and disburse SSA payments for these beneficiaries to ensure that their basic needs for shelter food and clothing are met Periodically however concerns have been expressed about the accuracy of the process by which SSA determines whether beneficiaries are capable of managing their benefits with some evidence suggesting that underdetection of incapable recipients may be a particular problem The importance of creating as accurate a process as possible for incapability determinations is underscored by the consequences of incorrectly identifying recipients either as incapable when they can manage their benefits or as capable when they cannot Failure to identify beneficiaries who are incapable of managing their funds means abandoning a vulnerable population to potential homelessness hunger and disease Informing Social Security's Process for Financial Capability Determination considers capability determination processes used by other similar benefit programs abilities required to manage and direct the management of benefits and effective methods and measures for assessing capability This report evaluates SSA's capability determination process for adult beneficiaries and provides recommendations for improving the accuracy and efficiency of the agency's policy and procedures for making these determinations A Guide for Leaders in Higher Education Brent D. FIRST EDITION SPECIAL RECOGNITION Winner of the 2018 Sue DeWine Distinguished Scholarly Book Award National Communication Association Applied Communication Division

REVIEWS OF THE FIRST EDITION The book provides frameworks and resources that would be highly relevant for new and aspiring department chairs In fact this text is ideally designed to serve as a selection for a book discussion group The Department Chair Succeeds in providing accessible and useful resources to individuals across different leadership roles As a midpoint between textbook and reference work it is successful at both and provides a clear and unbiased background to issues facing current leaders

Reflective Teaching During a time of unprecedented challenges facing higher education the need for effective leadership for informal and formal leaders across the organization has never been more imperative Since publication of the first edition the environment for higher education has become more critical and complex Whether facing falling enrollments questions of economic sustainability the changing composition of the faculty and student bodies differential retention and graduation rates declining public confidence in the enterprise or the rise in the use of virtual technologies not to mention how COVID 19 and an intensified focus on long standing issues of racial and gender representation and equity have impacted institutions and challenged many long standing assumptions it is clear that learning on the job no longer suffices Leadership development in higher education has become essential for advancing institutional effectiveness which is the focus of this book Taking into account the imperative issues of diversity inclusion and belonging and the context of institutional mission and culture this book centers on developing capacities for designing and implementing plans strategies and structures connecting and engaging with colleagues and students and communicating and collaborating with external constituencies in order to shape decisions and policies It highlights the need to think broadly about the purposes of higher education and the dynamics of organizational excellence and to apply these insights effectively in goal setting planning and change leadership outcomes assessment addressing crises and continuous improvement at both the level of the individual and organization The concepts and tools in this book are equally valuable for faculty and staff leaders whether in formal leadership roles such as deans chairs or directors of institutes committees or task forces or those who perform informal leadership functions within their departments disciplines or institutions It can be used as a professional guide a textbook in graduate courses or as a resource in leadership training and development programs Each chapter concludes with a series of case studies and guiding questions

Taylor, 2015-10-28 According to management and psychology courses as well as legions of consultants in organizational psychology shared vision in dyads teams and organizations can fill us with hope and inspire new possibilities or delude us into following false prophets However few research studies have empirically examined the impact of shared vision on key organizational outcomes such as leadership effectiveness employee engagement organizational citizenship coaching and organizational change As a result the field of organizational psychology has not yet established a causal pattern of whether if and how shared vision helps dyads teams and organizations function more effectively The lack of empirical work around shared vision is surprising given its long standing history in the literature Bennis and Nanus 1982 showed that distinctive leaders managed attention through vision The practitioner literature has long proclaimed that vision is a key to change while Conger and Kanungo 1998 discussed its link to charismatic leadership Around the same time positive psychology appeared in the forms of Appreciative Inquiry Cooperrider Sorensen Whitney Yaeger 2000 and Positive Organizational Scholarship Cameron Dutton Quinn 2003 In this context a shared vision or dream became a legitimate antecedent to sustainable change But again empirical measurement has been elusive More recently shared vision has been the focus of a number of dissertations and quantitative studies building on Intentional Change Theory ICT Boyatzis 2008 at dyad team and organization levels of social systems These studies are beginning to lay the foundations for a systematic body of empirical knowledge about the role of shared vision in an organizational context For example we now know that shared vision can activate neural networks that arouse endocrine systems and allow a person to consider the possibilities of a better future Jack Boyatzis Leckie Passarelli Khawaja 2013 Additionally Boyatzis Akrivou 2006 have discussed the role of a shared vision as the result of a well developed set of factors that produce a desired image of the future Outside of the organizational context positive visioning has been known to help guide future behavior in sports psychology Loehr Schwartz 2003 medical treatment Roffe Schmidt Ernst 2005 musical performance Meister Krings Foltys Boroojerdi Muller Topper Thron 2004 and academic performance Curry Snyder Cook Ruby Rehm 1997 This Research Topic for Frontiers in Psychology is a collection of 14 original papers examining the role of vision and shared vision on a wide variety of desired dependent variables from leadership effectiveness and executive performance to organizational engagement citizenship and corporate social responsibility and how to develop it through

Transforming Public Services by Design Sabine Junginger, 2016-12-01 For policy makers and policy implementers design challenges abound Every design challenge presents an opportunity for change and transformation To get from policy intent to policy outcome however is not a straightforward journey It involves people and services as much as it involves policies and organizations Of all organizations perhaps government agencies are perceived to be the least likely to change They are embedded in enormous bureaucratic structures that have grown over decades if not centuries In effect many people have given up hope that such an institution can ever change its ways of doing business And yet from a human centered design perspective they present a fabulous challenge Designed by people for people they have a mandate to be citizen centered but they often fall short of this goal If human centered design can make a difference in this organizational context it is likely to

have an equal or greater impact on an organization that shows more flexibility for example one that is smaller in size and less entangled in legal or political frameworks Transforming Public Services by Design offers a human centered design perspective on policies organizations and services Three design projects by large scale government agencies illustrate the implications for organizations and the people involved in designing public services the Tax Forms Simplification Project by the Internal Revenue Service 1978 1983 the Domestic Mail Manual Transformation Project by the United States Postal Service 2001 2005 and the Integrated Tax Design Project by the Australian Tax Office These case studies offer a unique demonstration of the role of human centered design in policy context This book aims to support designers and managers of all backgrounds who want to know more about reorienting policies organizations and services around people
