Spradlin,P.B. Porterfield,2012-12-06 Who are we What are we How do we fit into the world Or into the universe These and other questions pertaining to ourselves and our environment are as compelling to us today as they were to our primitive ancestors Throughout our history we have developed paradigms of thought that have attempted to answer these questions each conceptual framework being particularly relevant to its age We are in the twentieth century witnessing a complete reorganization of our thinking We are now with the aid of technology able to bring together both ancient and new patterns of thought and to observe the emergence of a kaleidoscopic world view that is uniting the once dissonant theories of philosophy religion and science This book sketches an historical picture of three world views that have shaped our ideas about ourselves These conceptual formats that have so influenced us are not mutually exclusive and are present in all of us simultaneously although to varying degrees depending upon our individual biases     **Earth Under Fire** Paul A. **Science as a Spiritual Practice** Imants Barušs,2015-10-21 Science as a Spiritual Practice is in three parts In the first part the author argues that there are problems with materialism and that self transformation could lead individual scientists to more comprehensive ways of understanding reality In the second part he takes on the contentious notion of inner knowledge and shows how access to inner knowledge could be possible in some altered states of consciousness The third part is an analysis of the philosophy of Franklin Wolff who claimed that the transcendent states of consciousness which occurred for him resulted from his mathematical approach to spirituality      **Thermodynamics and Ecological Modelling** Sven E. Jorgensen,2018-10-03 Thermodynamics is used increasingly in ecology to understand the system properties of ecosystems because it is a basic science that describes energy transformation from a holistic view In the last decade many contributions to ecosystem theory based on thermodynamics have been published therefore an important step toward integrating these theories and encouraging a more wide spread use of them is to present them in one volume An ecosystem consists of interdependent living organisms that are also interdependent with their environment all of which are involved in a constant transfer of energy and mass within a general state of equilibrium or dis equilibrium Thermodynamics can quantify exactly how organized or disorganized a system is an extremely useful to know when trying to understand how a dynamic ecosystem is behaving A part of the Environmental and Ecological Math Modeling series Thermodynamics and Ecology is a book length study the first of its kind of the current thinking on how an ecosystem can be explained and predicted in terms of its thermodynamical behavior After the introductory chapters on the fundamentals of thermodynamics the book explains how thermodynamic theory can be specifically applied to the measurement of an ecosystem including the assessment of its state of entropy and enthalpy Additionally it will show economists how to put these theories to use when trying to quantify the movement of goods and services through another type of complex living system a human society      **Associations'** **Publications in Print** ,1984 1981 in 2 v v 1 Subject index v 2 Title index Publisher title index Association name index Acronym index Key to publishers and distributors abbreviations      **English Mechanic and Mirror of Science** ,1901
