The End of Doom Ronald Bailey, 2015-07-21 In the past five decades there have been many many forecasts of impending environmental doom They have universally been proven wrong Meanwhile those who have bet on human resourcefulness have almost always been correct In his widely praised book *Ecoscam* Ronald Bailey strongly countered environmentalist alarmism using facts to demonstrate just how wildly overstated many claims of impending ecological doom really were Now twenty years later the Reason Magazine science correspondent is back to assess the future of humanity and the global biosphere Bailey finds contrary to popular belief that many present ecological trends are quite positive Including Falling cancer incidence rates in the United States The likelihood of a declining world population by mid century The abundant return of agricultural land to nature as the world reaches peak farmland A proven link between increases in national wealth and reductions in air and water pollution Global warming is a problem but the cost of clean energy could soon fall below that of fossil fuels In *The End of Doom* Bailey avoids polemics and offers a balanced fact based and ultimately hopeful perspective on our current environmental situation Now isn't that a breath of fresh air

Climate Change and the UN Security Council Shirley V. Scott, Charlotte Ku, 2018-03-30 In this forward looking book the authors consider how the United Nations Security Council could assist in addressing the global security challenges brought about by climate change Contributing authors contemplate how the UNSC could prepare for this role progressing the debate from whether and why the council should act on climate insecurity to how Scholars activists and policy makers will find this book a fertile source of innovative thinking and an invaluable basis on which to develop policy

Tobbell, 2022-12-28 An analysis of the efforts of American nurses to

establish nursing as an academic discipline and nurses as valued researchers in the decades after World War II Nurses represent the largest segment of the U S health care workforce and spend significantly more time with patients than any other member of the health care team Dr Nurse probes their history to examine major changes that have taken place in American health care in the second half of the twentieth century The book reveals how federal and state health and higher education policies shaped education within health professions after World War II Starting in the 1950s academic nurses sought to construct a science of nursing distinct from that of the related biomedical or behavioral sciences that would provide the basis for nursing practice Their efforts transformed nursing s labor into a valuable site of knowledge production and proved how the application of their knowledge was integral to improving patient outcomes Exploring the knowledge claims strategies and politics involved as academic nurses negotiated their roles and nursing s future Dr Nurse highlights how state supported health centers have profoundly shaped nursing education and health care delivery Just Security in an Undergoverned World William Durch,Joris Larik,Richard Ponzio,2018-01-19 Just Security in an Undergoverned World examines how humankind can manage global problems to achieve both security and justice in an age of antithesis Global connectivity is increasing visibly and invisibly in trade finance culture and information helping to spur economic growth technological advance and greater understanding and freedom but global disconnects are growing as well Ubiquitous electronics rely on high value minerals scraped from the earth by miners kept poor by corruption and war People abandon burning states for the often indifferent welcome of wealthier lands whose people in turn draw into themselves Humanity s very success underwritten in large part by lighting up gigatons of long buried carbon for 200 years now threatens humanity s future The global governance institutions established after World War II to manage global threats especially the twin scourges of war and poverty have expanded in reach and impact while paradoxically losing the political support of some of their wealthiest and most powerful members Their problems mimic those of their members in struggling to adapt to new problems and maintain trust in norms and public bodies This volume argues however that a properly mandated managed and modernized global architecture offers unparalleled potential to midwife solutions to intractable issues from violent conflict and climate change to poverty and pandemic disease that transcend borders and the capacities of individual actors It offers just security as a new framework for charting innovating solutions and strategies for effective and essential global governance

Don't Wait for the Next War Wesley K. Clark,2014-09-16 With the end of the Cold War came not the end of history but the end of America s sense of its strategic purpose in the world Then after a decade of drift the US was violently dragged back into international conflict Its armed forces responded magnificently but its leaders objectives were substantially flawed We fought the wrong war twice for reasons that were opaque and few American citizens understood the cause for which their sons and daughters were fighting and dying War is a poor substitute for strategic vision and decisions made in the heat of imminent conflict are often limited by the emotions of the moment In Don t Wait for the Next War Wesley K Clark a retired

four star general of the US army and former Democratic candidate for president presents a compelling argument for continued American global leadership and the basis on which it can succeed a new American strategy America needs both new power and deeper perspective The platform for American leadership is to use America s energy resources to spark sustainable economic growth building new strength to deal with pressing domestic issues like the deficit as well as the longer term challenges to US security terrorism cyber threats the next financial crisis China s rising power and climate change Such a strategy is not only achievable but essential and it is urgently needed This is the true test of American leadership for the next two decades but it must start now so America has the power and vision to deal with the acute crises that will inevitably come in the Mideast Europe or Asia **Climate Change 2021 - The Physical Science Basis** Intergovernmental Panel on Climate Change (IPCC),2023-07-26 The Working Group I contribution to the Sixth Assessment Report of the Intergovernmental Panel on Climate Change IPCC provides a comprehensive assessment of the physical science basis of climate change It considers in situ and remote observations paleoclimate information understanding of climate drivers and physical chemical and biological processes and feedbacks global and regional climate modelling advances in methods of analyses and insights from climate services It assesses the current state of the climate human influence on climate in all regions future climate change including sea level rise global warming effects including extremes climate information for risk assessment and regional adaptation limiting climate change by reaching net zero carbon dioxide emissions and reducing other greenhouse gas emissions and benefits for air quality The report serves policymakers decision makers stakeholders and all interested parties with the latest policy relevant information on climate change Available as Open Access on Cambridge Core Research within the Disciplines Peggy Keeran,Michael Levine-Clark,2014-04-28 Research within the Disciplines is designed to help reference librarians and students studying to become librarians gain that deeper understanding of disciplinary differences that allows them to comfortably solve information needs rather than merely responding to questions and practical knowledge about how to work with researchers in a library setting The book has three chapters that cover the disciplines at the broadest level humanities social sciences and sciences plus supplemental chapters that focus on associated disciplines research in history business and engineering research using government sources and across disciplines interdisciplinary and critical information literacy For the second edition of Research within the Disciplines several chapters have been added that together give a broader and deeper overview of research across all subject areas research practices of creative and performing artists and of clinical scientists research in international documents research strategies for foreign language materials and visual literacy across the disciplines Major shifts in technology have been accounted for that have changed how we do research and have expanded the range of resources available to researchers in all disciplines All of the chapters have been rewritten or heavily revised this is much more a new book than a new edition Life-Cycle of Structures and Infrastructure Systems Fabio Biondini,Dan M. Quantum Economics David Orrell, 2018-07-05 A decade after the financial crisis there is a growing consensus that economics has failed and needs to go back to the drawing board David Orrell argues that it has been trying to solve the wrong problem all along Economics sees itself as the science of scarcity Instead it should be the science of money which plays a surprisingly small role in mainstream theory And money is a substance that turns out to have a quantum nature of its own Just as physicists learn about matter by studying the exchange of particles at the subatomic level so economics should begin by analysing the nature of money based transactions Quantum Economics therefore starts with the meaning of the phrase how much or to use the Latin word quantum From quantum physics to the dualistic properties of money via the emerging areas of quantum finance and quantum cognition this profoundly important book reveals that quantum economics is to neoclassical economics what quantum physics is to classical physics a genuine turning point in our understanding

Creation Care and the Gospel LAUSANNE MOVEMENT, 2016-06-02 How should Christians react to environmental crisis Historically evangelicals have ignored this aspect of living for Christ so this book aims to reinvigorate and empower Christians across the globe to care for creation This book collects the work of biblical scholars theologians biologists environmental researchers and community organizers who met at The Global Consultation on Creation Care and the Gospel in Jamaica in 2012 Participants from 23 countries as diverse as Argentina Bangladesh Benin and Canada gathered for five days to pray talk and reflect on the state of the planet the home in which we live and on the role and ministry of the church in caring for God's creation The book contains biblical and

theological affirmations from well respected scholars and teachers reminding us that caring for creation is central to the evangelical faith It is an integral part of our mission an expression of our worship of God and a matter of great joy and hope
