The Secure and the Dispossessed Nick Buxton, Ben Hayes, 2015-11-20 While the world's scientists and many of its inhabitants despair at the impact of climate change corporate and military leaders see nothing but opportunities For them melting ice caps mean newly accessible fossil fuels borders to be secured from climate refugees social conflicts to be managed and more failed states in which to intervene They are securing their assets at the expense of the planet and its inhabitants *The Secure and the Dispossessed* looks at these deadly approaches with a critical eye It also considers the flip side that the legitimacy of the elite is under unprecedented pressure from resistance by communities to resource grabs to those creating new ecological and socially just models for managing our energy food and water Topics covered include geoengineering militarism refugee protection greenwashing and the agricultural crisis among others Adaptation and resilience to a climate changed world is desperately needed but the form it will take will affect all of our futures

International Handbook of Research in History, Philosophy and Science Teaching Michael R. Matthews, 2014-07-03 This inaugural handbook documents the distinctive research field that utilizes history and philosophy in investigation of theoretical curricular and pedagogical issues in the teaching of science and mathematics It is contributed to by 130 researchers from 30 countries it provides a logically structured fully referenced guide to the ways in which science and mathematics education is informed by the history and philosophy of these disciplines as well as by the philosophy of education more generally The first handbook to cover the field it lays down a much needed marker of progress to date and provides a platform for informed and coherent future analysis and research of the subject The publication comes at a time of heightened worldwide concern over the standard of science and mathematics education attended by fierce debate over how best to reform curricula and enliven student engagement in the subjects There is a growing recognition among educators and policy makers that the learning of science must dovetail with learning about science this handbook is uniquely positioned as a locus for the discussion The handbook features sections on pedagogical theoretical national and biographical research setting the literature of each tradition in its historical context It reminds readers at a crucial juncture that there has been a long and rich tradition of historical and philosophical engagements with science and mathematics teaching and that lessons can be learnt from these engagements for the resolution of current theoretical curricular and pedagogical questions that face teachers and administrators Science educators will be grateful for this unique encyclopaedic handbook Gerald Holton Physics Department Harvard University This handbook gathers the fruits of over thirty years research by a growing

Grounding Global Climate Change Heike Greschke,Julia Tischler,2014-09-25 This book traces the evolution of climate change research which long dominated by the natural sciences now sees greater involvement with disciplines studying the socio cultural implications of change In their introduction the editors chart the changing role of the social and cultural sciences delineating three strands of research socio critical approaches which connect climate change to a call for cultural or systemic change a mitigation and adaption strand which takes the physical reality of climate change as a starting point and focuses on the concerns of climate change affected communities and their participation in political action and finally culture sensitive research which places emphasis on indigenous peoples who contribute the least to the causes of climate change who are affected most by its consequences and who have the least leverage to influence a solution Part I of the book explores interdisciplinarity climate research and the

role of the social sciences including the concept of ecological novelty an assessment of progress since the first Rio climate conference and a global village case study from Portugal Part II surveys ethnographic perspectives in the search for social facts of global climate change including climate and mobility in the West African Sahel and human non human interactions and climate change in the Canadian Subarctic Part III shows how collaborative and comparative ethnographies can spin global webs of local knowledge describing case studies of changing seasonality in Labrador and of rising water levels in the Chesapeake Bay These perspectives are subjected to often amusing always incisive analysis in a concluding chapter entitled You Ain t Seen Nothing Yet a death defying look at the future of the climate debate The contributors engage critically with the research subject of climate change itself reflecting on their own practices of knowledge production and epistemological presuppositions Finely detailed and sympathetic to a broad range of viewpoints the book sets out a profile for the social sciences and humanities in the climate change field by systematically exploring methodological and theoretical challenges and approaches
