Prospectus and List of Members Hakluyt Society, 1903 Includes a list of the society's publications Assessing Academic Literacy in a Multilingual Society Albert Weideman, John Read, Theo du Plessis, 2020-11-02 South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy The dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the national population are native speakers of these languages Nine other languages can be media of instruction in schools which makes the transition to tertiary education difficult enough in itself for students from these schools The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience Prospectus United Nations Institute for Namibia, 1981 *The Strategic Repositioning of Arts, Culture and Heritage in the 21st Century* George Mugovhani, Owen Seda, 2018-06-11 The post millennium world has been experiencing several recognisable historical milestones with regard to arts culture and heritage One of these has been the resuscitation and revival of creative elements of the arts culture and heritage of previously marginalised or disadvantaged communities around the world Until recently there had been scant regard and skewed allocation of resources for these but lately attempts have been made to promote and sustain them in order to enable the socio economic aspirations of a multicultural society The contributions brought together here are the product of papers that were presented during a conference on Strategic Repositioning of Arts Culture and Heritage in the 21st Century They cover a broad spectrum of subjects such as indigeneity music song and identity politics national reconciliation education product development and national development **Prospectus ...** Brooklyn Institute of Arts and Sciences, 1900 **From #RhodesMustFall Movements to #HumansMustFall Movements** Artwell Nhemachena, Jairos Kangira, 2021-05-14 Might it be possible that the world is being migrated into an era where the imperial periphery will be increasingly governed through Artificial Intelligence AI and robotics designed to replace human beings Celebrated as efficient strong unfailing tireless precise and beyond corruption AI and robots are set to replace African leaders who are imperially deemed to be and consistently condemned as corrupt failed weak and inefficient But if these AI and robots are neo imperial tools and machinations the million dollar question is whether empire is not returning to recolonise the supposedly inefficient Africans via the new technologies and machinism Where Africans once celebrated their liberation war movements empire has enplaced what it calls liberation technologies designed to supposedly liberate African youths from their own states and governments led by liberation movements Where Africans once celebrated their liberation war movements empire has placed its own NGOs CSOs spewing liberal ideologies designed to ostensibly liberate African youths from their own supposedly

failed and corrupt states and government leaders With African youths citizens allying not with their liberation movements but with the liberation technologies and liberal NGOs CSOs it is not surprising why African citizens oppose their states led Fast Track Land Redistribution Programmes while ironically they happily celebrate Fast Tracked COVID 19 Vaccines Positing the notion of HumansMustFall movements this book underscores ways in which empire is in a process of eternal return to 21st century Africa The book is crucial for scholars and activists in political science government studies sociology anthropology cultural studies history languages and communication studies security studies military studies and development studies

Lewis,2020-06-10 This book provides the first full account of the 20 year story of universal access and service in South Africa's ICT sector From 1994 the country's first democratic government set out to redress the deep digital divide afflicting the overwhelming majority of its citizens already poor and disenfranchised but likewise marginalised in access to telephone infrastructure and services By this time an incipient global policy regime was driving reforms in the telecomms sector and also developing good practice models for universal service Policy diffusion thus led South Africa to adopt adapt and implement a slew of these interventions In particular roll out obligations were imposed on licensees and a universal service fund was established But an agency with a universal service mandate was also created and licences in under serviced areas were awarded The book goes on to identify and analyse the policy success and failure of each of these interventions and suggests some lessons to be learned

University Apartheid in South Africa Teresa A. Barnes,2018-12-07 South Africa continues to be an object of fascination for people everywhere interested in social justice issues postcolonial studies and critical race theory as manifested by the enormous worldwide attention given to the RhodesMustFall movement In this book Teresa Barnes examines universities complex positioning in the apartheid era and argues that tracing the institutional legacies left by pro apartheid intellectuals are crucial to understanding the fight to transform South African higher education A work of interpretive social history this book investigates three historical dynamics in the relationship between the apartheid system and South African higher education First it explores how the legitimacy of apartheid was historically reproduced in public higher education Second it looks at ways that academics maneuvered through and influenced national and international discourses of political freedom and legitimacy Third it explores how and where stubborn tendrils of apartheid era knowledge production practices survived into and have been combatted during the democratic era in South African universities

Planning By Law and Property Rights Reconsidered Barrie Needham,Thomas Hartmann,2016-04-22 Countries which take spatial planning seriously should take planning law and property rights also seriously There is an unavoidable logical relationship between planning law and property rights However planning by law and property rights is so familiar and taken for granted that we do not think about the theory behind it As a result we do not think abstractly about its strengths and weaknesses about what can be achieved with it and what not how it can be improved how it could be complemented Such reflections are essential to cope with current and future challenges to spatial planning This book makes the often implicit theory behind planning by law and property rights explicit and relates it to those challenges It starts by setting out what is understood by planning by law and property rights and investigates theoretically and by game simulation the relationships between planning law and property rights It then places planning law and property rights within their institutional setting at three different scales when a country undergoes enormous social and political change when there is fundamental political debate about the power of the state within a country and when a country changes its legislation in response to European policy Not only changing

institutions but also global environmental change pose huge challenges for spatial planning The book discusses how planning by law and property rights can respond to those challenges by adaptive planning by adaptable property rights and by public policies at the appropriate geographical level Planning by law and property rights can fix a local regime of property rights which turns out to be inappropriate but difficult to change It questions whether such regimes can be changed and whether planning agencies can make such undesirable lock ins less likely by reducing market uncertainty and if so by what means
