Prospectus Of University Of Kzn 2016:

University Community Engagement and Lifelong Learning Julia Preece, 2017-07-13 This book offers a conceptual re-think of how university community engagement functions as a lifelong learning resource for communities. While having a specific focus on the South African context, it has important implications for other universities which are concerned with their communities and makes a compelling argument for the university as a public good in spite of current trends towards marketization and commodification of higher education. The book draws on a theoretical framework of capabilities asset-based community development and the adult learning concept of dialogue to propose a model whereby the boundary walls of the university become metaphorically porous so that community members feel free to interact with the university as equal members of society. A historical outline of African universities is provided as well as an exploration of the evolution of terms for community engagement, service learning and learning cities and an examination of the policy and practice implications for the ideological model of a porous university.

Global Science's Cooperation Opportunities, Challenges, and Good Practices Moussaoui, Mohamed, 2023-07-24 Science diplomacy gives possibilities for international diplomacy and science policy to collaborate to more directly address social and global challenges such as successful diplomatic engagement, international scientific coordination and policy coherence in response to the COVID 19 pandemic. However, most academic scientists lack policy process training, networking opportunities with science policymakers and the capacity to use their expertise in the field to advance policy or diplomacy. These barriers limit scientists' research impact, inhibit science policy relations, reduce science recommendations and restrict university engagement in national and international contexts. The origins of science diplomacy have yet to be closely examined and its current format does not give a clear understanding of how it concretely translates into science policy actions. *Global Science's Cooperation Opportunities, Challenges, and Good Practices* provides a comprehensive overview of science diplomacy and its evolution in history and analyzes the ways in which politics, science and diplomacy intertwine. The book also provides a critical review of science diplomacy by exposing its limitations in addressing global challenges and by reflecting on the specific questions relating to the adaptation of the science diplomacy concept to the context of the Global South. Covering key topics such as climate change, foreign policy and energy consumption, this premier reference source is ideal for policymakers, government officials, politicians, industry professionals, researchers, academicians, scholars, practitioners, instructors and students.

Places of Privilege, 2018-07-19 *Places of Privilege* examines dynamics of privilege and power in the construction of place in a period of the rapid social transformation of places, borders and boundaries. Drawing on interdisciplinary perspectives, the book examines place as a site for the making and re-making of privilege while considering new meanings of community and examining spaces for cultural identity and resistance. Chapters point to a range of conceptual resources that can be utilised to produce critical analyses of place making. As the authors point out, power and privilege shape place but these dynamics are in turn shaped by the specific
