get lunch tomorrow and Siri answers with places near my home Problem is that tomorrow I m going to be at the Apple iPhone 5 launch in San Francisco Siri is quite stupid about context location and a bunch of other things Will it improve Apple already announced some improvements to Siri for instance Siri will with iOS 6 be able to start applications But it s hardly expected to be contextually aware in any real way Ask Siri what is my favorite gas station Siri answers I don t know The problem is that isn t really true Apple knows what gas stations I m most likely to stop at Or it could if it just knew how to contextually evaluate the data that both Verizon and Apple already have streaming from my phone If it doesn t know something like my favorite gas station it certainly doesn t know the answer to something simple like how many times do I eat at Chinese restaurants That s easily verifiable Ask it such a question and it just brings up a list of Chinese restaurants near you It doesn t even try to accurately turn down the question But back to Jobs He saw Siri s potential to add a new simpler contextually aware user interface to any device There are lots of rumors that Apple will use something like Siri in other products like its Apple TV product In fact at dinner the other night I learned that at least one of the team members that remains at Apple is now working on a secret new project I doubt we ll learn about that tomorrow but I ll be looking for signs that Apple understands how to take us into the contextual age I ll be looking for signs that Steve Jobs passion for Siri is still being listened to
