Document Analysis Systems: Theory and Practice Seong-Whan Lee, Yasuaki Nakano, 2003-07-31 Recently there has been an increased interest in the research and development of techniques for components of complete document analysis systems. In recognition of this trend a series of workshops on Document Analysis Systems commenced in 1994 under the leadership of Henry Baird. The first workshop held in Kaiserslautern, Germany, in October 1994 was chaired by Andreas Dengel and Larry Spitz. The second workshop on Document Analysis Systems was held in Malvern, PA, USA, in October 1996, chaired by Jonathan J. Hull and Suzanne Liebowitz Taylor. The DAS workshop has been one of the most prestigious technical meetings bringing together a large number of scientists and engineers from all over the world to express their innovative ideas and report on their latest achievements in the area of document analysis systems. The papers in this special book edition were rigorously selected from the Third IAPR Workshop on Document Analysis Systems (DAS 98) held in Nagano, Japan, on 4-6 November 1998. It is worth mentioning that the papers were chosen for their original and substantial contributions to the workshop theme and this special book edition. From among the 53 papers that were presented by authors from 11 countries at the DAS 98, after critical reviews by at least three experts, we carefully selected 29 papers for this special book edition. Most of the contributions in this edition have been expanded or extensively revised to include helpful discussions, suggestions, or comments made during the workshop.

Document Recognition, 1998 **Changing Roles and Contexts for Health Library and Information Professionals** Alison Brettell, Christine Urquhart, 2011-11-23 This timely edited collection examines the evolving role of health professionals and explores the role they play in the context of where they work. It aims to encourage and inspire health information professionals worldwide to take on new opportunities and ensure their continued development and recognition as valuable assets in the changing health care environment. Library and information professionals working in the health sector face many challenges. Rapid developments in information technology and the provision of information coupled with organizational developments and the widespread adoption of evidence-based practice have ensured constant change for a number of years. How have library and information professionals met this challenge and how has this affected the roles they play? Will developments in services render the hospital librarian obsolete? Is there a need for academic health librarians amongst the Google generation of students? The key topics covered in the book are providing information, facilitating access to information, and managing knowledge, building capacity, undertaking research and evaluation, supporting research and practice, exploiting technology, evidence-based practice. Readership: Information workers and other health professionals as well as students on librarianship and information studies courses.
