Lodge, John Hattie, 2016-07-22 Over recent years the field of Science of Learning has increased dramatically Unfortunately despite claims that this work will greatly impact education very little research makes it into teacher practice Although the reasons for this are varied a primary concern is the lack of a proper translation framework From the Laboratory to the Classroom aims to consolidate information from many different research disciplines and correlate learning principles with known classroom practices in order to establish explanatory foundations for successful strategies that can be implemented into the classroom It combines theoretical research with the diverse and dynamic classroom environment to deliver original effective and specific teaching and learning strategies and address questions concerning what possible mechanisms are at play as people learn Divided into five sections chapters cover A Framework for Organizing

and Translating Science of Learning Research Motivation and Attention as Foundations for Student Learning Memory and Metamemory Considerations in the Instruction of Human Beings Science of Learning in Digital Learning Environments Educational Approaches for Students Experiencing Learning Difficulties and Developmental Characteristics of Gifted Children Brain Behaviour and Classroom Practice Forging Research Practice Relationships via Laboratory Schools This fascinating text gathers an international team of expert scientists teachers and administrators to present a coherent framework for the vital translation of laboratory research for educational practice Applying the Science of Learning framework to a number of different educational domains it will be an essential guide for any student or researcher in education educational psychology neuropsychology educational technology and the emergent field of neuroeducation

Understanding Test and Exam Results Statistically Kaycheng Soh, 2016-08-09 This book shares the goal of the classic text *How to Lie with Statistics* namely preventing and correcting statistical misconceptions that are common among practitioners though its focus is on the educational context It illustrates and discusses the essentials of educational statistics that will help educational practitioners to do this part of their job properly i e without making conceptual mistakes The examples are cast in the school classroom contexts based on realistic rather than theoretical examples The strongest aspect of the work or author's view is that the author can put himself in the shoes of teachers and make the work a very practical guide for teachers and school leaders As a very experienced educator and researcher the author knows very well about the knowledge skills that are essential for the professional development of teachers He is able to explain the statistical and measurement concepts in plain language and with examples that are highly relevant to the target audience In addition the author also conveyed an important message to the target audience throughout the work by pointing out the mistakes and misunderstandings of the interpretation of test scores and measurement design The author reminds the audience about the importance of proper use of tests and test scores when teachers and school leaders make any education decisions which has much implication on the professional integrity of teachers and school leaders Dr Joyce Kwan The Education University of Hong Kong Hong Kong This book covers all the statistical tools for analyzing educational data and provides examples to explain the ideas Chapters 10-17 are practical data analysis in educational data that helps readers have a better understanding of the procedure to analyze the data Dr Alpha Ling The Education University of Hong Kong Hong Kong It looks like a very interesting book with attractive topics and practical problems in educational statistics Though the topics remind me of the classic book *How to Lie with Statistics* this book aims at preventing and correcting statistical misconceptions in educational context Dr Zhu Ying National Institute of Education Nanyang Technological University Singapore

Active Learning: Theoretical Perspectives, Empirical Studies and Design Profiles Robert Cassidy, Elizabeth S. Charles, James D. Slotta, Nathaniel Lasry, 2019-07-11 This book represents the emerging efforts of a growing international network of researchers and practitioners to promote the development and uptake of evidence based pedagogies in higher

education at something a level approaching large scale impact By offering a communication venue that attracts and enhances much needed partnerships among practitioners and researchers in pedagogical innovation we aim to change the conversation and focus on how we work and learn together i e extending the implementation and knowledge of co design methods In this first edition of our Research Topic on Active Learning we highlight two of the three types of publications we wish to promote First are studies aimed at understanding the pedagogical designs developed by practitioners in their own practices by bringing to bear the theoretical lenses developed and tested in the education research community These types of studies constitute the practice pull that we see as a necessary counterbalance to knowledge push in a more productive pedagogical innovation ecosystem based on research practitioner partnerships Second are studies empirically examining the implementations of evidence based designs in naturalistic settings and under naturalistic conditions Interestingly the teams conducting these studies are already exemplars of partnerships between researchers and practitioners who are uniquely positioned as in between straddling the two worlds As a result these publications represent both the rigours of research and the pragmatism of reflective practice In forthcoming editions we will add to this collection a third type of publication design profiles These will present practitioner developed pedagogical designs at varying levels of abstraction to be held to scrutiny amongst practitioners instructional designers and researchers alike We hope by bringing these types of studies together in an open access format that we may contribute to the development of new forms of practitioner researcher interactions that promote co design in pedagogical innovation
