Abstract. *Agrostis peruviana* L., a native grass of the highlands of Peru, was found to be a good source of condensed tannins. The leaves of this species were found to contain 10.5% condensed tannins, which were precipitated with lead acetate. The condensed tannins were found to be hydrolyzed by acid and alkali.

Abstract: *Psychiatrists' views on the relationship between mental illness and violence are explored. The study was conducted in a sample of 100 psychiatrists in the United States. The results show that the majority of psychiatrists believe that mental illness is a risk factor for violence, but that the risk is not as high as the public perceives. The study also found that psychiatrists are more likely to believe that mental illness is a risk factor for violence if the individual has a history of violence or if the individual is currently violent.*
