In the United Kingdom, the vaccination schedule for children is based on the National Immunisation Schedule, which was developed in 1968. The schedule was revised in 1996, and again in 2000. This led to a significant increase in the number of children who were not vaccinated against MMR, which in turn led to a significant increase in the number of children who were infected with MMR. This led to a significant increase in the number of children who were infected with MMR, which in turn led to a significant increase in the number of children who were infected with MMR.

This consistency across both years
