Ulla Licandro, 2016-07-11 The current work follows the premise that fictional oral narratives represent socio emotionally and academically relevant communicative practices. Two studies are presented aiming to 1) analyze the narrative skills of preschool age Turkish German dual language learners DLLs and 2) explore a peer assisted approach to supporting DLLs narrative skills in early childhood education and care. ### **Understanding the Worlds of Young Children**

Laurie Katz, Melissa Wilson, 2021-03-01 Children begin their literacy journeys from the moment of their birth as they begin to read the world around them. They embark on their journeys as they observe and react to the gestures and voices of their family members and hear and use the language in which they are immersed to communicate with others. Through their interactions with the sign systems surrounding them they become socialized into the cultural practices of their communities and construct meaning in their lives. Children's entrance into formal education where they begin to read the word further connect them with literacies of other communities both nationally and globally. Thus the early years become a critical time to build and support current and future learning where children develop into creative problem solvers, thoughtful communicators and productive leaders and citizens of the next generation. This volume extends current knowledge of children's learning by exploring the importance of children's earliest years within the context of their families and communities and connecting those years with their formal education. Development is viewed through a child's *perezhivanie* a concept by Vygotsky (1933, 1934, 1994) that expresses the unity of the individual's biological and cultural development. According to Vygotsky, development does not isolate the individual from her/his social context. Children are social beings from birth who acquire and make meanings of their world through their

interactions with their families friends childcare providers religious groups and other community members These interactions encompass the way children use language within children s ecosocial physical and social worlds where development occurs How these ecosocial worlds support each other or collide will impact children s literacy development This unique contribution provides the reader with opportunities to a Recognize the importance of literacy practices as cultural and social within the context of the multiple worlds of young children b promote a continuity of children s ecosocial worlds into their formal education through concepts of perezhivanie and resource based pedagogies and c envision an alternative framework for recognizing children s ecosocial worlds outside of the classroom and integrating aspects of those worlds to involve families in their child s formal education [The Routledge Companion to Media and Fairy-Tale Cultures](#) Pauline Greenhill,Jill Terry Rudy,Naomi Hamer,Lauren Bosc,2018-03-28 From Cinderella to comic con to colonialism and more this companion provides readers with a comprehensive and current guide to the fantastic uncanny and wonderful worlds of the fairy tale across media and cultures It offers a clear detailed and expansive overview of contemporary themes and issues throughout the intersections of the fields of fairy tale studies media studies and cultural studies addressing among others issues of reception audience cultures ideology remediation and adaptation Examples and case studies are drawn from a wide range of pertinent disciplines and settings providing thorough accessible treatment of central topics and specific media from around the globe **Catalog of Copyright Entries.
