

Benefits Of Recycling Persuasive Essay

The highly material intensive nature of the modern industry has led to huge resource consumption and compilation of large amount of industrial and municipal waste leading to depletion of natural system, erosion of earth's resource base, global warming, rise of sea level, deterioration of environment, and increasing extinction rate of animal life, causing severe impairment to earth's ability to support the human civilization in its current framework.

The dangers presented by the unchecked growth and resource consumption became manifest to the world in 1985 after the discovery of the ozone hole over Antarctica that informed the global community of the urgency of problem. As a consequence and in the response to the challenge presented to humanity's future by its own march towards development, leaders of world met in June, 1992 in Rio De-Janeiro in the first earth summit where against the current pattern of development, sustainable development was identified as the required path for the world to follow.

One of the important aspects of sustainable development has been recycling of products and waste. Benefits of recycling for society Recycling as a process holds important place in the course of sustainable development for any society. As an activity, its relevance extends beyond a goodwill action to one that holds crucial environmental, economic and social significance for the society and the country (Pellow, Schnaiberg, Winberg, 2000).

Recycling helps to constitutes a perfect model of social and urban development where resource consumption is optimized and needs for new material contained while production is maintained at the same levels, thereby driving up the profits and quality of life in the urban communities. The urban community in the post industrial phase has been swamped by the problem of municipal waste and garbage, which has taken menacing proportion, both from the point of view of making valuable urban landscape as redundant as well as causing significant environment damage.

In the initial phase of recycling that started in 1960s, it was an avenue for employment for the marginalized section and profit making opportunity to many private entrepreneurs. The hauling, collection and dumping of garbage was a big problem for municipalities of many cities and was considered an unnecessary drain on their already constrained financial resources, causing deterioration in quality of city life.

As the private entrepreneurs saw opportunity in the business of waste management and trash disposal they developed professional expertise in gaining maximum value out of the waste that was an important step in emergence of recycling (Pellow, Schnaiberg, Winberg, 2000). In the forthcoming years it was realized that recycling was also an important tool
