Commerce, Justice, Science, and Related Agencies Appropriations for 2015 United States. Congress. House. Committee on Appropriations. Subcommittee on Commerce, Justice, Science, and Related Agencies, 2014 **Preventing Psychological Disorders in Service Members and Their Families** Institute of Medicine, Board on the Health of Select Populations, Committee on the Assessment of Resiliency and Prevention Programs for Mental and Behavioral Health in Service Members and Their Families, 2014-02-11 Being deployed to a war zone can result in numerous adverse psychological health conditions. It is well documented in the literature that there are high rates of psychological disorders among military personnel serving in Operation Enduring Freedom in Afghanistan and Operation Iraqi Freedom in Iraq as well as among the service members' families. For service members' families, the degree of hardship and negative consequences rises with the amount of the service members' exposure to traumatic or life-altering experiences. Adult and child members of the families of service members who experience wartime deployments have been found to be at increased risk for symptoms of psychological disorders and to be more likely to use mental health services. In an effort to provide early recognition and early intervention that meet the psychological health needs of service members and their families, DOD currently screens for many of these conditions at numerous points during the military life cycle and is implementing structural interventions that support the improved integration of military line personnel, non-medical caregivers, and clinicians such as RESPECT, Mil Re-engineering Systems of Primary Care, Treatment in the Military, embedded mental health providers, and the Patient-Centered Medical Home. Preventing Psychological Disorders in Service Members and Their Families evaluates risk and protective factors in military and family populations and suggests that prevention strategies are needed at multiple levels: individual, interpersonal, institutional, community, and societal, in order to address the influence that these factors have on psychological health. This report reviews and critiques reintegration programs and prevention strategies for PTSD, depression, recovery, support, and prevention of substance abuse, suicide, and interpersonal violence. *The Dope* Benjamin T. Smith, 2021-08-10 A myth-busting 100-year history of the Mexican drug trade that reveals how an industry founded by farmers and village healers became dominated by cartels and kingpins. The Mexican drug trade has inspired prejudiced narratives of a war between north and south, white and brown, between noble cops and vicious kingpins, corrupt politicians and powerful cartels. In this first comprehensive history of the trade, historian Benjamin T. Smith tells the real story of how and why this one peaceful industry turned violent. He uncovers its origins and explains how this illicit business essentially built modern Mexico, affecting everything from agriculture to medicine to economics and the country's all-important relationship with the United States. Drawing on unprecedented archival research, leaked DEA, Mexican law enforcement, and cartel documents, and dozens of harrowing interviews, Smith tells a thrilling story brimming with vivid characters: from Ignacia La Nacha Jasso, queen pin of Ciudad Juárez, to Dr. Leopoldo Salazar Viniegra, the crusading physician who argued that marijuana was harmless and tried to

decriminalize morphine to Harry Anslinger the Machiavellian founder of the American Federal Bureau of Narcotics who drummed up racist drug panics to increase his budget Smith also profiles everyday agricultural workers whose stories reveal both the economic benefits and the human cost of the trade The Dope contains many surprising conclusions about drug use and the failure of drug enforcement all backed by new research and data Smith explains the complicated dynamics that drive the current drug war violence probes the U S backed policies that have inflamed the carnage and explores corruption on both sides of the border A dark morality tale about the American hunger for intoxication and the necessities of human survival The Dope is essential for understanding the violence in the drug war and how decades old myths shape Mexico in the American imagination today Handbook of Military Psychology Stephen V. Bowles,Paul T.
