Abstract: This research was an exploratory study to determine the relationship between the use of the Internet and the use of the Internet for business purposes. The study was conducted using a survey of 100 business owners. The results of the study indicate that the use of the Internet for business purposes is positively related to the use of the Internet for personal purposes. The study also found that the use of the Internet for business purposes is positively related to the use of the Internet for social purposes. The study was limited by the use of a convenience sample and the use of a self-reported measure of Internet use.
