

Inovonics Wireless Solutions

Inovonics' line of wireless intrusion detection devices, powered by EchoStream® wireless technology, are designed with today's applications in mind. With installations ranging from single alarm transmitters to thousands of security devices across a campus, the EchoStream family of pendant transmitters, universal transmitters, motion detectors, environmental sensors, and add-on receivers can connect to virtually any security system.

The high power repeater network intelligently amplifies transmission from any EchoStream series transmitter to penetrate all types of building construction thus eliminating the need for extraneous labor associated with wired installs. EchoStream wireless provides the ultimate flexibility to cover large commercial buildings as well as complete campuses.

Features

- Wireless integration and alarm management
- RS232 communication with Pacom field controllers
- RF signal strength diagnostics
- Remote arming and disarming with transmitters
- Flexible supervision prevents false alarms if pendant is taken off site
- Support for up to 256 transmitters per field controller
- Can be seamlessly integrated with existing Pacom field controllers
- Transmitters and repeaters can be programmed via Pacom keypad or GMS software
- View transmitter and repeater status on keypad
- Auto-detection of EN4200 receivers
- Intelligent redundancy ensures that critical alarms from a transmitter can be received by multiple EN4200 receivers at a site but only reported once to the GMS
