CHAPTER 12 - AMER

What does Amer say about living in America compared to India?

In India, people know their neighbors, but in America people keep to themselves and don't interact unless they are known friends.

Why do people start to talk to Amer after he plants vegetables in the garden?

They asked him about his eggplants and were curious about them.

How do the people of the garden solve problems?

They all work together and help each other to better their community and give a hand to those in need.

How does talking to the Polish woman change Amer's thoughts on Polish people?

He used to think that they were all stereotypically tough and ate lots of cabbage, but after talking to his Polish neighbor about her time during the Holocaust, he no longer cared about the stereotypes he had in mind and instead only cared about helping her as a person.

Why do the gardeners start to take better care of Boyce?

At first, they thought he was scary, but once they got to know him they realized how kind and selfless he was and they all started to take better care of him. Getting to know him made the gardeners abandon their stereotypes and accept Boyce for who he actually was.

How do the gardeners celebrate the end of summer?

They threw a big harvest celebration where they all shared food and talked to each other. It brought the community together and dispelled the imaginary borders between people.

Toward a More Visual Literacy Jennifer S. Dail, Shelbie Witte, Steven T. Bickmore, 2018-05-04

Technology and multimodal texts must be included as part of the literacies we teach in 21st century schools. Implementing multiple modes of literacy requires that teachers shift their focus toward multiple genres and modes of text. This shift to the visual requires that teachers consider how students read images in the classroom, address visual literacy, and engage students in constructing visual texts. Students already live and communicate in a virtual world connected by expansive networks, and many also read young adult literature. Given this, researchers and practitioners in the field examine ways texts written for students can be combined with digital tools to craft more critical conversations around literary response and digital media consumption and production. This book explores ways adolescents read, engage, and construct meaning within the world around them and examines how teachers can leverage the use of young adult literature with digital practices within their classrooms.
