Practical Software Factories in .NET Gunther Lenz, Christoph Wienands, 2006-11-22 The promise of software factories is to streamline and automate software development and thus to produce higher quality software more efficiently The key idea is to promote systematic reuse at all levels and exploit economies of scope which translates into concrete savings in planning development and maintenance efforts However the theory behind software factories can be overwhelming because it spans many disciplines of software development On top of that software factories typically require significant investments into reusable assets This book was written in order to demystify the software factories paradigm by guiding you through a practical case study from the early conception phase of building a software factory to delivering a ready made software product The authors provide you with a hands on example covering each of the four pillars of software factories software product lines architectural frameworks model driven development and guidance in context While the ideas

behind software factories are platform independent the Microsoft NET platform together with recent technologies such as DSL Tools and the Smart Client Baseline Architecture Toolkit makes an ideal foundation A study shows the different facets and caveats and demonstrates how each of these technologies becomes part of a comprehensive factory Software factories are a top candidate for revolutionizing software development This book will give you a great starting point to understanding the concepts behind it and ultimately applying this knowledge to your own software projects Contributions by Jack Greenfield Wojtek Kozaczynski Foreword by Douglas C Schmidt Jack Greenfield Jorgen Kazmeier and Eugenio Pace [Microsoft 365 and SharePoint Online Cookbook](#) Gaurav Mahajan, Sudeep Ghatak, Nate Chamberlain, Scott Brewster, 2024-02-29 Unlock over 100 recipes for mastering Microsoft 365 Boost productivity with Copilot collaborate with SharePoint and Teams automate tasks create apps and reports using Power Automate with RPA Power Apps Power BI and more Get With Your Book PDF Copy AI Assistant and Next Gen Reader Free Key Features Enhance collaboration and productivity using SharePoint Teams OneDrive Viva Planner and Microsoft Forms Automate processes build apps bots and dashboards with Power Automate with RPA Power Apps Copilot Studio and Power BI Harness Copilot the new AI virtual assistant for seamless support in your everyday tasks Book Description Microsoft 365 offers tools for content management communication process automation and report creation Microsoft 365 and SharePoint Online Cookbook maximizes workplace collaboration and productivity using SharePoint Online Teams OneDrive Delve M365 Search Copilot Power Platform Viva Planner and Microsoft Forms You will find thoroughly updated recipes for SharePoint Online covering sites lists libraries pages web parts and learn SharePoint Framework SPFx basics for building solutions You will explore many Microsoft Teams recipes to prepare it to be your organization's central collaboration hub You will be able to unlock Power Platform potential with recipes for Power Apps to enable low code no code app development and learn to automate tasks with Power Automate and Power Automate Desktop The book teaches you data visualization with Power BI and chatbot creation with Power Virtual Agents Copilot Studio Finally you will also learn about the cutting edge Copilot and Gen AI functionality in Microsoft 365 and Power Platform By the end you will be equipped with skills to effectively use Microsoft 365 SharePoint Online and the Power Platform Whether it's enhancing career prospects or improving business operations this book is a perfect companion on your journey through the Microsoft Office 365 suite What you will learn Collaborate effectively with SharePoint Teams OneDrive Delve Search and Viva Boost creativity and productivity with Microsoft Copilot Develop and deploy custom applications using Power Apps Create custom bots using Power Virtual Agents Copilot Studio Integrate with other apps automate workflows and repetitive processes with Power Automate Desktop RPA Design reports and engaging dashboards with Power BI Utilize Planner To Do and gather feedback with polls and surveys in Microsoft Forms Experience seamless integration in the mobile platform Who this book is for This cookbook caters to professionals stepping into the world of Microsoft 365 and SharePoint Online It is tailored for a broad spectrum of skillsets including general business professionals IT administrators and enterprise architects
