work in the history of psychology When Carl Jung embarked on an extended self exploration he called his confrontation with the unconscious the heart of it was The Red Book a large illuminated volume he created between 1914 and 1930 Here he developed his principle theories of the archetypes the collective unconscious and the process of individuation that transformed psychotherapy from a practice concerned with treatment of the sick into a means for higher development of the personality While Jung considered The Red Book to be his most important work only a handful of people have ever seen it Now in a complete facsimile and translation it is available to scholars and the general public It is an astonishing example of calligraphy and art on a par with The Book of Kells and the illuminated manuscripts of William Blake This publication of The Red Book is a watershed that will cast new light on the making of modern psychology [The Red Book of C.G. Jung](#) Walter Boechat,2018-05-08 This book focuses on some of the main aspects and importance of The Red Book for the understanding of the work of C G Jung It sheds light on the great mysteries of human nature and the new dimension uncovered by Jung and Freud the universe of the unconscious and the possible ways to approach it **Lament of the Dead** James Hillman,Sonu Shamdasani,2013-08-19 With Jung s Red Book as their point of departure two leading scholars explore issues relevant to our thinking today In this book of dialogues James Hillman and Sonu Shamdasani reassess psychology history and creativity through the lens of Carl Jung s Red Book Hillman the founder of Archetypal Psychology was one of the most prominent psychologists in America and is widely acknowledged as the most original figure to emerge from Jung s school Shamdasani editor and cotranslator of Jung s Red Book is regarded as the leading Jung historian Hillman and Shamdasani explore a number of the issues in the Red Book such as our relation with the dead the figures of our dreams and fantasies the nature of creative expression the relation of psychology to art narrative and storytelling the significance of depth psychology as a cultural form the legacy of Christianity and our relation to the past and examine the implications these have for our thinking today **The Red Book: Reflections on C.G. Jung's Liber Novus** Thomas Kirsch,George Hogenson,2017-09-19 In 2009 WW Norton published The Red Book a book written by Jung in 1913 1914 but not previously published Snippets of information about the likely contents of the Red Book had been in circulation for years and there was much debate and eager anticipation of its publication within the Jungian field and the larger reading public In 2010 a conference was held at the San Francisco Jungian Institute which brought together an international group of distinguished scholars in analytical psychology to explore and address critical contextual aspects of The Red Book and to debate its importance for current and future Jungian theory and practice The Red Book Reflections on C G Jung s Liber Novus is based on that conference the individual papers have been thoroughly revised and updated for this book and address some of the important questions and issues that were raised at that conference in response to the presentation of these papers As yet there has been very little published about The Red Book The Red Book Reflections on C G Jung s Liber Novus will contribute to setting the agenda for further research both scholarly and clinical in response to Jung s account of his experiences between 1913 1914 when arguably the

future course of his entire project was set in motion This book will be essential reading for any Jungian interested in the importance of The Red Book analytical psychologists trainee analysts those with an interest in the history of ideas and historians

Answer to Jung Lynn Brunet, 2018-11-08 The Red Book is C G Jung's record of a period of deep penetration into his unconscious mind in a process that he called active imagination undertaken during his mid life period Answer to Jung Making Sense of The Red Book provides a close reading of this magnificent yet perplexing text and its fascinating images and demonstrates that the fantasies in The Red Book are not entirely original but that their plots characters and symbolism are remarkably similar to some of the higher degree rituals of Continental Freemasonry It argues that the fantasies may be memories of a series of terrifying initiatory ordeals possibly undergone in childhood using altered or spurious versions of these Masonic rites It then compares these initiatory scenarios with accounts of ritual trauma that have been reported since the 1980s This is the first full length study of The Red Book to focus on the fantasies themselves and provide such an external explanation for them Sonu Shamdasani describes The Red Book as an incomplete task that Jung left to posterity as a message in a bottle that would someday come ashore Answer to Jung brings its message to shore providing a coherent but disturbing interpretation of each of the fantasies and their accompanying images Chapters Chapter 4 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
