Youth brought-up in impecunious housing are more susceptible to malnourishment, insufficient schooling, social issues, and difficulty achieving tasks and/or goals, both long-term and short-term. This research topic will discuss various primal problems that lead to impoverishment, such as: how the word poverty is typically defined, focal causes of low-incoming living, how it is measured, how it affects childhood growth, impoverishment in families, and what can be done to put an end to it.

Defining poverty has remained a controversial matter; should it be considered a matter of financial standing, or a lacking general social expectancies? Economically poverty is calculated on a scale, by way of measurement, to achieve the absolute poverty line. The calculations from these computations, are used in determining the expenditures per dietary standards, these proceed to be used to provide an allotted allowance for nourishment and necessities. The absolute poverty line assumes a threshold, to which, if not met, bestows an inability to maintain necessary living and health needed to survive.

Is one said to be impoverished if they live in an area with a high crime rate, even if their income exceeds the poverty threshold? Should a person be forced to reside in poverty because minimum wage is not sufficient enough to match or exceed the total income meeting the poverty threshold? Does the need for government assistance determine impoverishment? These vast outlooks on the topic of penury, give great difficulty in determining it's true meaning.

To be evaluated and considered to live in privation, individuals must not exceed a minimal income based upon all documented expenses. Universal understandings of poverty can only be acknowledged if it includes the diversified cultures of different areas. Economic struggles differ from country to country. Different measures are assumed to which regions can provide a certain quality of life. Poverty refers more towards a matter of survival. However, all the defining factors of this indigence state, give the negative impact on all developmental stages of a persons life, but most importantly; the affects on early
