Military Strategy Versus Diplomacy in Bismarck's Time and Afterwards Munroe Smith,1915 **A Revolution in Favor of Government** Max M. Edling,2008-07-08 What were the intentions of the Founders Was the American constitution designed to protect individual rights To limit the powers of government To curb the excesses of democracy Or to create a robust democratic nation state These questions echo through today s most heated legal and political debates In this powerful new interpretation of America s origins Max Edling argues that the Federalists were primarily concerned with building a government that could act vigorously in defense of American interests The Constitution transferred the powers of war making and resource extraction from the states to the national government thereby creating a nation state invested with all the important powers of Europe s eighteenth century fiscal military states A strong centralized government however challenged the American people s deeply ingrained distrust of unduly concentrated authority To secure the Constitution s adoption the Federalists had to accommodate the formation of a powerful national government to the strong current of anti statism in the American political tradition They did so by designing a government that would be powerful in times of crisis but which would make only limited demands on the citizenry and have a sharply restricted presence in society The Constitution promised the American people the benefit of government without its costs Taking advantage of a newly published letterpress edition of the constitutional debates *A Revolution in Favor of Government* recovers a neglected strand of the Federalist argument making a persuasive case for rethinking the formation of the federal American state *Congressional Record* United States. Congress,1997 Future War and the Defence of Europe John R. Allen,Frederick Ben Hodges,Julian Lindley-French,2021 This book offers a major new analysis of how peace and security can

be maintained in Europe and provides a radical vision of a technology enabling future European defence. It weaves history, strategy, policy and technology into a compelling analytical narrative and lays out the scale of the challenge Europeans and their allies face.

China's Grand Strategy Honghua Men, 2020-04-20. This book aims to build the ideal model of China's grand strategy framework which is based on three key variables: national power, strategic concept and international institution. Taking the rise of China as an opportunity, this book adopts the assessment of national strategic resources as the beginning, focuses on the evaluation of strategic capability, the choice of strategic orientation, the establishment of strategic objectives, the planning of strategic content and the implementation of strategic means. Further following this main line, this book establishes a China's grand strategy framework based on active participation and integration, transformation, shaping process. This book emphasizes that to achieve the goals of China's grand strategy, China should uphold this strategic attitude. It should not be seduced by praise and should not be made aggressive by criticism. It should learn to be glorious but remain humble, maintain a wealthy, influential but modest position by restraint. This book can be regarded as the essence of the author's 20 years long term focus and research on the China's grand strategy. The author's postdoctoral tutor Professor Hu Angang's comment of this book can hit the nail on the head. This book is a pioneering theoretical study of China's great strategic research and makes a significant contribution to this research field. The basic arguments of this book have been submitted through various approaches to decision making, references or published in academic papers and have received numerous positive responses and resonance. In my opinion, the basic ideas and important findings of this book will provide imperative reference to long term strategy decision making process. In addition, the fundamental theory and analysis method of the book will have an important influence in both domestic and international academic field.

Japanese Foreign Policy Today NA NA, 2016-04-30. The US remains the leading world power but across the Pacific, Japan has the world's second largest economy and great international economic clout. Some voices in the international arena have urged Japan to play more constructive and politically active roles in the international arena. This volume collects essays analyzing the key issues in Japan's international relations as it heads toward a new world order, the pressing global and regional issues and their domestic implications, the actors and the major policy directions.

Entente Diplomacy and the World George Abel Schreiner, 1921.

The Rhetoric of Heroic Expectations Justin S. Vaughn, Jennifer Mercieca, 2014-01-30. Campaign rhetoric helps candidates to get elected but its effects last well beyond the counting of the ballots; this was perhaps never truer than in Barack Obama's 2008 campaign. Did Obama create such high expectations that they actually hindered his ability to enact his agenda? Should we judge his performance by the scale of the expectations his rhetoric generated or against some other standard? *The Rhetoric of Heroic Expectations: Establishing the Obama Presidency* grapples with these and other important questions. Barack Obama's election seemed to many to fulfill Martin Luther King Jr's vision of the long arc of the moral universe bending toward justice. And after the terrorism war and economic downturn of the

previous decade candidate Obama's rhetoric cast broad visions of a change in the direction of American life. In these and other ways the election of 2008 presented an especially strong example of creating expectations that would shape the public's views of the incoming administration. The public's high expectations in turn become a part of any president's burden upon assuming office. The interdisciplinary scholars who have contributed to this volume focus their analysis upon three kinds of presidential burdens: institutional burdens specific to the office of the presidency; contextual burdens specific to the historical moment within which the president assumes office; and personal burdens specific to the individual who becomes president.
