Section 4 Guided Environmental Activism Answers:

Green European Audrone Telesiene, Matthias Gross, 2016-07-01 *Green European* addresses the quest for a better understanding of European types of environmentalism. This monograph focuses on public attitudes and behaviours and the culturally rooted as well as country specific differences. The book addresses the wider issue that many European countries are rendered green or as having an advanced environmental awareness but the question how green are Green Europeans really is yet to be answered. The book covers a variety of unique data driven comparative studies and is divided into three parts: the first addresses perceptions of environmental and technological threats and risks; the second part deals with environmental activism in Europe; the third discusses environmental attitudes, environmental concerns and their imminent link to personal pro environmental behaviour. The empirical comparative nature of the contributions is enabled by data from the International Social Survey Programme (ISSP). **Maternal Activism** Danielle Poe, 2015-02-11 *Maternal Activism* tells the stories of women who refused to ignore injustice even though many people urged them to stop their activism by claiming it would harm their children. Molly Rush, Michele Naar, Obed Cindy Sheehan and Diane Wilson recognized that the potential well being of their children relates to the damage done by US militarism and environmental destruction. These women's stories illustrate feminist ethical theory and contemporary theory from peace studies. By examining their context for addressing injustice and the theoretical supports for their action, this book demonstrates that issues of injustice overlap such that critiques of nuclear weapons lead to critiques of war and militarism which lead to critiques of environmental destruction.

Instructor's Resource Manual for Talk it Over! Joann Kozyrev, 1998 *Religious Environmental Activism in Asia* Leslie E. Spensel, 2020-04-09 Throughout the world, religious organizations are exploring and implementing into action ideas about the relevance of religion and spirituality in dealing with a growing multitude of environmental issues and problems. Religion and spirituality have the potential to be extremely influential for the better at many levels and in many ways through their intellectual, emotional and activist components. This collection focuses on providing a set of captivating essays on the specifics of concrete cases of environmental activism involving most of the main Asian religions from several countries. Particular case studies are drawn from the religions of Animism, Buddhism, Daoism, Hinduism, Islam and Jainism. They are from the countries of Bhutan, China, India, Indonesia and Thailand. Thereby, this set of case studies offers a very substantial and rich sampling of religious environmental activism in Asia. They are grounded in years of original field research on the subjects covered. Collectively, these case studies reveal a fascinating and significant movement of environmental initiatives in engaged practical spiritual ecology in Asia. Accordingly, this collection should be of special interest to a diversity of scientists, academics, instructors and students as well as communities and leaders from a wide variety of religions, environmentalism and conservation.

Youth Activism in Environmental Politics, 2nd Edition Matt Henn, Sarah Pickard, 2023-02-02 Recently important new research has emerged to explain the large intergenerational cleavages in values and political preferences in

many contemporary societies In most established democracies and many newer democracies young people are more likely to possess progressive values and are much more cosmopolitan in their outlook socially liberal accepting of cultural diversity and outward looking than older generations They tend to reject mainstream electoral politics and authoritarian nationalist forms of populism in favour of alternative progressive political parties and movements Indeed there is burgeoning evidence of a global tendency towards young people s support for and participation in new styles of non institutionalised political action that seem to better fit their life styles and to permit the actualisation of their political aspirations Although there is a considerable body of existing literature that examines the rise of such values and political participation preferences there is little work that focuses on the relationship with the prioritisation of environmental issues and environmental activism as evidenced in the September 2019 global climate strikes The goal of the current Research Topic is to explore the contemporary realities and patterns of youth participation in environmental politics in different societies As such we welcome manuscripts of original research and conceptualization that address the different practices of youth as they seek to effect environmental change and also their motivations for doing so Contributions are welcome from scholars youth practitioners and activists operating in a range of different settings and using diverse disciplinary and multidisciplinary and interdisciplinary perspectives

Global Bioethics Henk ten Have,2016-02-10 The panorama of bioethical problems is different today Patients travel to Thailand for fast surgery commercial surrogate mothers in India deliver babies to parents in rich countries organs body parts and tissues are trafficked from East to Western Europe physicians and nurses migrating from Africa to the U S thousands of children or patients with malaria tuberculosis and AIDS are dying each day because they cannot afford effective drugs that are too expensive Mainstream bioethics as it has developed during the last 50 years in Western countries is evolving into a broader approach that is relevant for people across the world and is focused on new global problems This book provides an introduction into the new field of global bioethics Addressing these problems requires a broader vision of bioethics that not only goes beyond the current emphasis on individual autonomy but that criticizes the social economic and political context that is producing the problems at global level This book argues that global bioethics is a necessity because the social economic and environmental effects of globalization require critical responses Global bioethics is not a finished product that can simply be applied to solve global problems but it is the ongoing result of interaction and exchange between local practices and global discourse It combines recognition of differences and respect for cultural diversity with convergence towards common perspectives and shared values The book examines the nature of global problems as well as the type of responses that are needed in order to exemplify the substance of global bioethics It discusses the ethical frameworks that are available for global discourse and shows how these are transformed into global governance mechanisms and practices
