

Self-Grading Uses Reflection

- Learners who self-graded learned from mistakes/errors through examining own work (Davis & Rand, 1980; Wagner, Suh, & Cruz, 2011).
- Learners who used reflective self-grading of calculus questions spent a lot more time reviewing their exam (than traditionally graded exams) and learned a lot more from mistakes (Cherpinsky, 2011)

Self Grading Reflection:

Classroom Assessment & Grading that Work Robert J. Marzano, 2006 Robert J Marzano distills 35 years of research to bring you expert advice on the best practices for assessing and grading the work done by today's students *Authentic Assessment* Katherine Luongo-Orlando, 2003 Authentic Assessment combines performance tasks that are relevant to students' lives with the need for accountability. The book explores common mandated language arts expectations and shows teachers how to choose meaningful activities that will guide students toward achieving important learning outcomes. This practical approach to task design includes suggestions for planning through evaluating and generating a mark as well as sensible ways to use assessment results to improve instructional practice. The book presents a thorough constructive background for authentic assessment of student work: clear definitions of terms related to assessment and evaluation; a step-by-step process for developing performance-based tasks; strategies for relating tasks to goals and expectations; numerous activities that can be used as is or adapted for specific needs. Designed for the busy teacher, the book includes ready-to-copy and use planning sheets, rubrics, and student surveys. Excellent samples of student work based on performance tasks complement this timely book.

Teaching Students to Self-Assess Starr Sackstein, 2015-10-26 In this essential guide, Starr Sackstein, a National Board Certified Teacher, explains how teachers can use reflection to help students decipher their own learning needs and engage in deep thought provoking discourse about progress. She explains how to help students set actionable learning goals, teach students to reflect on and chart their learning progress, and use student reflections and self-assessment to develop targeted learning plans and determine student mastery. Filled with practical tips, innovative ideas, and sample reflections from real students, this book shows you how to incorporate self-assessment and reflection in ways that encourage students to grow into mindful, receptive learners ready to explore a fast-changing world.

Portfolio Assessment for the Teaching and Learning of Writing Ricky Lam, 2018-06-26 This book provides teachers, instructors, scholars, and administrators with a practical guide to implement portfolio assessment of writing in their work contexts. Unlike most existing volumes which underscore theory building, it describes and discusses several key issues concerning how portfolio assessment can be carried out in authentic classrooms with a focus on its processes, reflective components, task types, and design, scoring methods, and actionable recommendations.

One-Day, One-Problem Glen O'Grady, Elaine Yew, Karen P.L. Goh, Henk Schmidt, 2012-04-13 One day one problem is a unique adaptation of problem-based learning (PBL) pioneered at Republic Polytechnic, Singapore. Here students are challenged each day with a problem from their domain and attain the necessary learning outcomes in the process of responding to the problem. Throughout the day, students would engage in small group discussions, self-directed learning, and conversations with their teacher who plays the role of a facilitator. This approach to learning and instruction represents a new brand of constructivist learning in a more structured learning environment compared to conventional PBL. This book contains a series of chapters by authors with first-hand experience in the One day one problem PBL approach.

Unlike other books on PBL the chapters are both research informed and practical Results of empirical studies into the factors of PBL such as quality of problems tutor behaviours scaffoldings student learning and interest are discussed together with practical implications for the educator The book begins with an overview of the one day one problem process providing a viewpoint from both the student and tutor Republic Polytechnic s pedagogical philosophy and epistemological belief of education are introduced with the intent to share how the polytechnic designed and implemented a system that supports the philosophical beliefs Results and practical implications of empirical studies on the various factors that influence students learning in PBL are discussed These include the quality of problems and the use of scaffoldings for students learning tutors as facilitators preparation of staff for PBL student assessment how students learn in the process of PBL and student interest
