Arete and the Odyssey's Poetics of Interrogation explores how the enigmatic Phaeacian queen Arete is at the heart of an epic-scale poetics of interrogation used throughout the *Odyssey* to negotiate Odysseus' kleos or epic renown. Arete's interrogation of Odysseus has been especially problematic in scholarship, but diachronic and synchronic analysis of similar interrogations across Indo-European, Orphic, and Greek epigrammatic corpora show that the stranger's interrogation is a formula that demands performance and negotiation of status. Within the *Odyssey*, this interrogation is part of an intraformular network used to generate kleos, and the queen's question initiates the longest and most complex negotiation of Odysseus' status in epic and memory. Arete's role as interrogator not only explains her strange

authority and resonance with both Penelope and comparative afterlife figures but it also establishes a gendered agonistic tension between she and her husband Alkinoos that influences the structure genre and narratology of performances across the Phaeacian episode This book reinterprets the Odyssey s central episode and challenges several assumptions about Nausikaa and Alkinoos famed hospitality even demonstrating how the Apologue is organized as a response to competing inquiries into Odysseus fundamental status in tradition The Odyssey ultimately navigates away from Odysseus public reputation and roots his status in private memories and Arete s carefully arranged interventions signal the larger process by which the Odyssey immortalizes Odysseus in poetry as a nostos hero The queen and her question invite new applications of oral poetics that shed light on the structure composition and reperformance of the Odyssey The Global Lab Adam Fejerskov,2022-06-16 The Global Lab tells the story of a group of organizations and corporations using low income countries as a laboratory It reveals experiments with untested technologies biometric humanitarian solutions and radical methodologies for social change The book maps out the political institutional and ethical coordinates of emergent transnational practices of experimentation asking where and how this movement works while unfolding the human philosophical and political consequences of its ideas and interventions The book takes the reader through Silicon Valley Africa and Asia to understand the tangible and transformative implications of contemporary human experimentation It follows a set of main protagonists from the Bill and Melinda Gates Foundation to experimental economists known as the randomistas to humanitarian organizations and pharmaceutical companies These actors form a movement inspired by the logic of Silicon Valley about the need for fast paced radical change and societal disruption technological innovation as progress and the privatization and commercialization of the human mind and body Ultimately the book examines the inequality of experimentation that is found in the erection of walls between us and them and the imagined universal and often unquestioned value of scientific and technological progress The Business of Dried Fruits and Vegetables : A Profitable Venture Vineeta Prasad,2025-03-22 The Business of Dried Fruits and Vegetables A Profitable Venture Discover the lucrative world of dried fruits and vegetables in this comprehensive guide Whether you re an aspiring entrepreneur or an established business owner looking to expand this book provides valuable insights into starting managing and scaling a profitable dried food business Learn about sourcing raw materials processing techniques packaging marketing strategies and distribution channels This book will help you turn your passion for healthy foods into a thriving enterprise **The Mentor** ,1928 **2035 AND BEYOND. Sentipensante (Sensing / Thinking) Pedagogy Laura I. Rendón, 2023-07-03 Challenging inspiring beautifully written and unusual, this book calls readers to find ways to link mind and heart, thinking and feeling, to transform teaching and learning in higher education. Laura Rendón has illustrated how one can unite one's deep beliefs, values, and feelings with one's keen analytical and intellectual abilities, an important thought provoking and unique addition to the literature on teaching, learning, and the academic life. The Review of Higher Education on the first edition. This new and expanded edition of the acclaimed and successful book by nationally recognized student advocate, activist, scholar, and contemplative educator, Laura Rendón, will surely find new audiences who are eager to create teaching and learning environments where the learner is fully present and engaged, using the full capacities of mind, body, and senses, and where the learning experience can be simultaneously subjective and objective, a view which challenges the privileged notion that only reason and objective modes of learning are valid. While the pedagogy can be employed with all students, Rendón provides support for faculty who work with low-income, first-generation, and racially minoritized learners. *Sentipensante Pedagogy* benefits all students through holistically meeting their emotional needs and quest for knowledge, and simultaneously fostering their civic sense, critical consciousness, and community engagement. Rendón offers an inspirational and contemplative pedagogy that leverages student assets and addresses the rhythmic balance and interconnection between intellectual, social, emotional, and inner life skill development. The book blends academic discussions about pedagogy and diverse world views, as it inspires a new generation of faculty and staff to develop blueprints for democratic, decolonial teaching and learning environments. The sensing thinking approach has been successfully adopted and adapted in courses and seminars across many academic disciplines, including STEM, in two- and four-year colleges and institutions. Several colleges and universities have created centers around contemplative studies and pedagogy, with applications extending to the K-12 education arena. As with adopting any new pedagogical approach, planning and thought needs to be given on how to integrate its reflective and creative elements with course content. This book offers inspiration and guidance for faculty who want to holistically address the needs, aspirations, and individual development of their students.
