is **symmetric distribution** indicates frequency distributions that have similar shape and values. However, sample means and sample means spread out and increasing but the distributions they are made. The following graph shows the frequency distributions of two variables, without sampling.

1. How would you describe the shape of this distribution?

Normal shows that the shape of the normal distribution is **bell-shaped**.

2. In the above graph on right, sketch what you think the frequency distributions might look like if the same sample sizes were taken from distributions having the same

**Normal distribution**

or frequency. Investigate how the shape of the frequency distributions of the population, which are known as **samples**, or **means** of the population, change as the sample size increases using the Populations and Samples Gizmo.

3. How does population distribution in the Gizmo compare to the frequency distributions described above, with some normal, skewed, uniform, and other shapes? (Click each distribution button.)
