Mayes' Midwifery E-Book Sue Macdonald, Gail Johnson, 2017-06-03 A new edition of a classic textbook fully updated to meet the needs of today's midwifery student. Now available for the first time in full color, the 15th edition of Mayes' Midwifery has an enhanced artwork program and comes with an extensive website which provides 600 MCQs and wide selection of case studies and reflective activities. A downloadable image bank assists with essay and assignment preparation. New edition of a classic textbook updated and designed for today's midwifery student. Chapters authored by experts in their field including midwifery academics and clinicians as well as allied professionals such as researchers, physiotherapists, neonatal nurse specialists, social scientists and legal experts. Evidence and research based throughout to help facilitate safe clinical practice. Learning outcomes and key points help readers structure their study and recap on what they have learned. Reflective activities encourage the application of theory to practice. Contains practice based tools and checklists. Presents and discusses the latest national and international guidelines. Associated website with over 600 MCQs, reflective activities to encourage the application of theory to practice, case studies and additional learning tools. Downloadable image bank to assist readers with essay preparation and other assignments. Suitable for use in normal community and midwife-led arenas, high tech environments and more rural areas of clinical practice. Brand new design incorporating helpful learning features, aids reader engagement and retention of facts. Updated artwork program helps clarify complex physiological processes and other challenging concepts.

On the process of maintenance decision-making in the offshore operational environment of the oil and gas industry Mario Marcondes Machado, 2022-07-08 The overall objective of this research is to develop a decision support framework for preventive maintenance program implementations in the offshore operational environment of the oil and gas industry. The author investigates the problems surrounding the maintenance decision making process which elements are systematically identified and categorized including organizational aspects. The interface with operations is considered in order to promote integration between maintenance and production schedules. The research sub-jacent objectives have been to identify among major oil and gas offshore operators the state of practices regarding the maintenance decision making process and identify in the literature the main techniques used for maintenance decisions and optimization in order to propose alternatives for supporting future implementations. Through a Systems Engineering approach assisted by a literature review, interviews with experts in Norway and in Brazil, an on-line survey and case studies, the results of this research complement a toolkit for maintenance engineers and managers aiming to facilitate information sharing and interdisciplinary cooperation in the operational environment. Among the results: A concept map for the maintenance decision making process ontology, A plan for PM program implementations, The suggested cross sector solution, the minimum equipment list, A Markovian dependability nomogram and A Markov decision model application.
