discussed as vague preferences not open to rigorous analysis In principle however theories of language comprehension can and should be subjected to the same criteria of explicitness and explanatoriness as other theories e g theories of grammar Thus their peripheral role in accounts of language development may reflect accidental factors rather than any inherent fuzziness or irrelevance to the language acquisition problem It seems probable that an explicit model of the way s processing routines are applied in acquisition would help solve some central problems of grammar acquisition since these routines regulate the application of grammatical knowledge to novel inputs
