Addressing Special Educational Needs and Disability in the Curriculum: History Richard Harris, Ian Luff, 2017-04-11 The SEND Code of Practice 2015 has reinforced the requirement that all teachers must meet the needs of all learners This topical book provides practical tried and tested strategies and resources that will support teachers in making history lessons accessible and exciting for all pupils including those with special needs The authors draw on a wealth of experience to share their understanding of special educational needs and disabilities and show how the history teacher can reduce or remove any barriers to learning Offering strategies that are specific to the context of history teaching this fully revised edition will enable teachers to Make history education accessible and engaging to pupils of all abilities Create an inclusive classroom environment that responds to the emotional needs of the class and nurtures a culture of learning Develop inclusive practical demonstration and role play techniques to aid conceptual understanding Set assessment objectives Deploy in class support effectively An invaluable tool for continuing professional development this text will be essential for teachers and their teaching assistants seeking guidance specific to teaching history to all pupils regardless of their individual needs This book will also be of interest to SENDCOs senior management teams and ITT providers In addition to practical activities and supporting material contained in the book there are also free online resources for readers to download and use in the preparation of successful inclusive lessons for all pupils

Forward with Classics Arlene Holmes-Henderson, Steven Hunt, Mai Musié, 2018-08-09 Despite their removal from England's National Curriculum in 1988 and claims of elitism Latin and Greek are increasingly re entering the mainstream educational arena Since 2012 there have been more students in state maintained schools in England studying classical subjects than in independent schools and the number of schools offering Classics continues to rise in the state maintained sector The teaching and learning of Latin and Greek is not however confined to the classroom community based learning for adults and children is facilitated in newly established regional Classics hubs in evenings and at weekends in universities as part of outreach and even in parks and in prisons This book investigates the motivations of teachers and learners behind the rise of Classics in the classroom and in communities and explores ways in which knowledge of classical languages is considered valuable for diverse learners in the 21st century The role of classical languages within the English educational policy landscape is examined as new possibilities exist for introducing Latin and Greek into school curricula The state of Classics education internationally is also investigated with case studies presenting the status quo in policy and practice from Australasia North America the rest of Europe and worldwide The priorities for the future of Classics education in these diverse locations are compared and contrasted by the editors who conjecture what strategies are conducive to success

Viggiani, Robert Mair, 2021-05-10 Geotechnical Aspects of Underground Construction in Soft Ground comprises a collection of 112 papers the Fujita Lecture three Special Lectures and the Bright Spark Lecture presented at the Tenth International

Symposium on Geotechnical Aspects of Underground Construction in Soft Ground held in Cambridge United Kingdom 27-29 June 2022. This second edition includes four general reports on the symposium themes. The symposium is the latest in a series which began in New Delhi in 1994 and was followed by symposia in London 1996, Tokyo 1999, Toulouse 2002, Amsterdam 2005, Shanghai 2008, Rome 2011, Seoul 2014 and Sao Paulo 2017. This was organised by the Geotechnical Research Group at the University of Cambridge under the auspices of the Technical Committee TC204 of the International Society for Soil Mechanics and Geotechnical Engineering (ISSMGE). **Geotechnical Aspects of Underground Construction in Soft Ground** includes contributions from more than 25 countries on research, design and construction of underground works in soft ground. The contributions cover: Field case studies; Sensing technologies and monitoring for underground construction in soft ground; Physical and numerical modelling of tunnels and deep excavations in soft ground; Seismic response of underground infrastructure in soft ground; Design and application of ground improvement for underground construction; Ground movements, interaction with existing structures and mitigation measures. The general reports give an overview of the papers submitted to the symposium, covered in four technical sessions. The proceedings include the written version of the five invited lectures covering topics ranging from developments in geotechnical aspects of underground construction, tunnelling and groundwater interaction, short and long term effects, the influence of earth pressure balance shield tunnelling on pre-convergence and segmental liner loading, field observations, modelling and implications on design. Similar to previous editions, **Geotechnical Aspects of Underground Construction in Soft Ground** represents a valuable source of reference on the current practice of analysis, design and construction of tunnels and deep excavations in soft ground. The book is particularly aimed at academics and professionals interested in geotechnical and underground engineering.
