Harpur, 2010-07-30 University ethics is everyone's business and big business is what the university is all about whether in the US Europe or the rest of the world How this has come about is less important than that it has and is being taken very seriously by global and national forces The important issue confronting higher education is its assumed role in guaranteeing economic prosperity Governments are no longer content to let research leak out serendipitously into the economy The Post Industrial Society Information Society Knowledge Economy and Smart Economy require nothing less than commercially directed research producing innovative products The public interest is reduced to economic measures The political social and moral implications of changing practices in the university are rarely acknowledged in the rise of the New Alchemy This book examines the resulting ambiguities and questionable evidence in favour of current policies
