which then uses the heat from the concentrated beams to power an electrical generator The heat can either be utilized directly to preheat water or a structure or it can be converted into steam to power a turbine Due to the absence of greenhouse gas emissions and air pollution during operation solar power is considered a sustainable and pure energy source It is beneficial for reducing the use of fossil fuels which helps reduce global warming Rooftops solar farms and even space based solar power stations are all viable locations for installing solar energy systems *Solar Energy* W.
