Original Vixen Polaris Telescope Mount User Manual:

The Vixen Star Book User Guide James Chen, Adam Chen, 2015-10-01 This book is for anyone who owns or is thinking of owning a Vixen Star Book Ten telescope mount or its predecessor. A revolution in amateur astronomy has occurred in the past decade with the wide availability of high tech computer driven Go To telescopes. Vixen Optics is leading the way by offering the Star Book Ten system with its unique star map graphics software. The Star Book Ten is the latest version of computer telescope control using star map graphics as a user interface first introduced in the original Star Book first offered in 2003. The increasingly complicated nature of this software means that learning to optimize this program is not straightforward and yet the resulting views when all features are correctly deployed can be phenomenal. After a short history of computerized Go To telescopes for the consumer amateur astronomer market, Chen offers a treasury of technical information. His advice, tips, and solutions aid the user in getting the most out of the Star Book Ten system in observing sessions.

The NexStar Evolution and SkyPortal User's Guide James L. Chen, Adam Chen, 2016-05-26 This book serves as a comprehensive guide for using a Nexstar Evolution mount with WiFi SkyPortal control, walking the reader through the process for aligning and operating the system from a tablet or smartphone. The next generation Go To mount from Celestron, this is compatible not only with the Nextstar Evolution but also with older mounts. It is the ideal resource for anyone who owns or is thinking of owning a Nexstar Evolution telescope or adapting their existing Celestron mount. Pros and cons of the system are thoroughly covered with a critical depth that addresses any possible question by users. Beginning with a brief history of Go To telescopes and the genesis of this still new technology, the author covers every aspect of the newly expanding capability in observing. This includes the associated Sky Portal smartphone and tablet application, the transition from the original Nexstar GoTo system to the new SkyPortal system, the use of the Sky Portal application with its Sky Safari 4 basic software, and Celestron WiFi adaptations and discussions on the use of SkyPortal application using the Celestron adapter on older Celestron mounts. Comments and recommendations for equipment enable the reader to successfully use and appreciate the new WiFi capability without becoming overwhelmed. Extensively illustrated using actual screenshots from the program interface, this is the only guide to the Nextstar SkyPortal an observer will need.

Choosing and Using a Refracting Telescope Neil English, 2010-09-28 Choosing and Using a Refracting Telescope has been written for the many amateur astronomers who already own or are intending to

purchase a refracting telescope perhaps to complement their existing arsenal of larger reflecting telescopes or for the specialist who requires a particular refractor for serious astronomical applications or nature studies Four hundred year ago during the winter of 1609 a relatively unknown Italian scientist Galileo Galilei designed a spyglass with two crude lenses and turned it skyward Since then refractors have retained their dominance over all types of reflector in studies of the Moon planets and double stars because of the precision of their optics and lack of a central obstruction in the optical path which causes diffraction effects in all commercially made reflectors Most mature amateur astronomers got started with a 60mm refractor or something similar Thirty years ago there was little choice available to the hobbyist but in the last decade long focus crown flint achromats have moved aside for some exquisitely crafted apochromatic designs offered by leading commercial manufacturers There has been a huge increase in the popularity of these telescopes in the last few years led by a significant increase in the number of companies particularly William Optics Orion USA StellarVue SkyWatcher and AstroTech who are now heavily marketing refractors in the amateur astronomical magazines In *Choosing and Using a Refracting Telescope* well known observer and astronomy writer Neil English celebrates the remarkable history and evolution of the refracting telescope and looks in detail at the instruments their development and their use A major feature of this book is the way it compares not only different classes of refractor but also telescopes of each class that are sold by various commercial manufacturers The author is perhaps uniquely placed to do this having used and tested literally hundreds of different refracting telescopes over three decades Because it includes many diverse subjects such as imaging with consumer level digital cameras imaging with webcams and imaging with astronomical CCD cameras that are not covered together in equal depth in any other single volume *Choosing and Using a Refracting Telescope* could become the refractor bible for amateur astronomers at all levels especially those who are interested in imaging astronomical objects of every class *Astronomy Now*, 2001 [Japan Close-up](#), 2006 *The Urban Astronomer's Guide* Rod Mollise, 2006-12-22 Most amateur astronomers yearn to observe more frequently Many of them however live in urban and highly developed suburban areas that are heavily light polluted Due to this light pollution they are under the impression that deep sky objects nebulae galaxies star clusters are either invisible or not worth viewing from home This book describes the many objects that can be seen in a bright urban sky and shows the city or suburban astronomer how to observe object after object season after season This book covers the why how and what of astronomy under light polluted skies The prospective city based observer is told why to observe from home there are hundreds of spectacular objects to be seen from the average urban site how to observe the city sky telescopes accessories and modern techniques and what to observe About 50% of the book is devoted to describing tours of the sky with physical and observational descriptions at the eyepiece drawings and photographs **Choosing and Using a New CAT** Rod Mollise, 2009-02-28 *Choosing and Using the New CAT* will supersede the author's successful *Choosing and Using a Schmidt Cassegrain Telescope* which has enjoyed enthusiastic support from the amateur astronomy community for

the past seven years Since the first book was published a lot has changed in the technology of amateur astronomy The sophistication and variety of the telescopes available to amateurs has increased dramatically Computerized SCTs Maksutov Cassegrains and most recently Meade s new and acclaimed Ritchey Chr tiens have come to dominate the market That means that all amateurs considering the purchase of a new telescope not only a SCT and not just beginners will benefit from this detailed guide Choosing the right telescope for particular kinds of observation or even for general work is far from easy but Rod Mollise gives invaluable advice and guidance *User's Manual for the NRAO 12 M Millimeter-wave Telescope, Kitt Peak, Arizona* National Radio Astronomy Observatory (U.S.),1990 **User's Manual for the NRAO 12m Millimeter-wave Telescope** Philip R.
