

Pro Choice Abortion: Because It's Safer

Introduction

Whether or not a women should be able to legally have an abortion in the United States is a very controversial issue. Abortion is the deliberate termination of a pregnancy. It became legal in 1973 after the deliberation of the supreme court case 'Roe vs. Wade'. Before then it was very hard for women to have abortions and many sought out doing it on their own. Since as early as the 13th century abortion has been considered homicide. As far as current laws, abortion is legal throughout the United States but some states make it harder to get one. For example, Mississippi has some of the most restrictive laws which makes it the hardest state to get an abortion. In fact the state itself only has one functional Planned Parenthood clinic.

Other states like California and New Mexico have minimal restrictions. Many women who want to have an abortion have to travel across state lines because of their states' restrictive laws. For example a woman from Oklahoma had to travel 4 hours to Kansas just to have an abortion. Southern states typically have stricter abortion laws. States like Missouri and Mississippi only have one abortion clinic in the whole state. Other states like California and New York have a large amount of abortion clinics. Great intro! Informative and detailed, sets reader up to know enough to get into perspectives.

Main Body of Paper

Abortion is currently, and has been throughout the 21st Century, a controversial issue.

Primarily there have two main sides the argument, pro choice and pro life. Majority of the reasoning on the pro choice is that a woman should be able to have the right to do what she wants with her body. The U.S. Supreme court has also declared the right to abort as a "fundamental right" which is described as a basic human right. Other examples of fundamental rights are privacy and procreation. A lot people also explain that there are many reasons as to why a woman may need to have an abortion. (look at how the sentence before this is worded) Medical complications for the mother and baby may be an issue or a woman may simply not have the means to take care of a child. The pro life side of the argument says that the fetus is a human being and they should have the right of life. A baby should not be terminated simply because a woman is not ready to have a child. To them abortion is considered murder because you are terminating one's life. Another pro life argument is that human life begins at conception so a baby has the right to live just like any other person. Well done paragraph on two sides of abortion argument

Religious Beliefs on Abortion and its Impact on Abortion Law in the U.S.

Religious perspectives also contribute to whether or not a woman gets an abortion, which in the end would affect her health. In those religions in which a woman is banned from having an abortion, the health effects of having an abortion are more negative.

[The Pro-Choice Movement](#) Suzanne Staggenborg, 1991-07-25 In this highly praised analysis of the controversial pro choice movement Suzanne Staggenborg traces the development of the movement from its origins through the 1980s She shows how a small group of activists were able to build on the momentum created by other social movements of the 1960s to win their cause the legalization of abortion in 1973 and argues that professional leadership and formal organizational structures together with threats from the anti abortion movement and grass roots support enabled the pro choice movement to remain an active force even after their primary goal had been achieved

change Women's Human Rights and Migration Sital Kalantry, 2017-05-26 Some of the most hotly contested international women's rights issues today arise from the movement of peoples from one country to another and the practices they purportedly bring with them In Women's Human Rights and Migration Sital Kalantry focuses on immigrants of Asian descent living in the United States who are believed to abort female fetuses because they do not want a female child While sex selective abortion is a human rights concern in India should we for that reason assume that the practice undermines women's equality in the United States Although some pro choice feminists believe that these prohibitions on sex selective abortion promote women's equality other feminists fiercely oppose such laws characterizing them as a Trojan horse in the larger pursuit to overturn the reproductive rights guaranteed by *Roe v Wade* Nearly half of state legislatures in the United States have proposed laws restricting sex selective abortion since 2009 and nine have adopted them Kalantry argues that traditional feminist legal theories and international human rights law fail to provide adequate guidance in examining the human rights implications of the reproductive practices of immigrant women evidenced by the fact that both supporters and opponents ground their claims in women's equality She advocates instead for a context based approach that is open to the possibility that sex selective abortion practices will have significantly different human rights implications when they emerge in different national contexts The product of extensive empirical and interdisciplinary research Kalantry's book investigates the actual occurrence of sex selective abortion among Asian Americans the social and cultural contexts in which women in the United States and India practice sex selective abortion and the consequences of the laws in each country for women's equality Women's Human Rights and Migration develops a transnational feminist legal approach to examining and legislating contested acts that result from migration **Survivor Injustice** Kylie Cheung, 2023-08-15 Journalist and Jezebel staff writer Kylie Cheung exposes the insidious and often unseen connections among domestic abuse state based violence political disenfranchisement and the carceral state An astonishingly original powerfully honest vision for true survivor justice Kirkus starred review For readers of *The Revolution Starts at Home* Feminism for the 99% and *Good and Mad* Incisive urgent and written exactly for our post *Roe* times *Survivor Injustice* is the feminist frame changing read we need now for each of us and for all that's at stake With an abolitionist lens journalist and Jezebel staff writer Kylie Cheung shows how domestic abuse and state violence are systemic and interconnected She shatters the harmful and convenient narrative that abuse is a private matter perpetrated by individual bad actors and situates popular understandings of domestic abuse in an indictment of the racism misogyny and carcerality baked into U S culture and politics Cheung explores The links between capitalism and domestic abuse how late stage capitalism colludes with the state to incentivize forced birth and reproductive coercion Intimate partner violence as a tool of political silence and social control America's tacit acceptance of sexual assault from the home to the White House The interplay of race power gender and sexuality in state based violence How the United States runs on carcerality and what that means for victims The way we view survival crimes and our complicity in defining which

Feminist Perspectives on Social Work and Human Sexuality Mary Valentich,James Gripton,2016-06-10 First published in 1985 this ground breaking volume contributes to a largely neglected area of social work research theory and practice The collection of essays by internationally known social work educators and practitioners applies feminist perspectives to a wide range of issues influencing the social work profession and social work practice In doing so it demonstrates that a liberal feminist position is consistent with social work practice Nearly all the chapters focus on direct practice issues such as problems faced by women who have been sexually assaulted the lack of adequate health care provided to lesbians from traditional health care systems and sexist bias in sex therapy and family therapy models This book will be of interest to students and practitioners of social work *What Women Want* Deborah L. Rhode,2014-08-01 What Women Want comprehensively analyzes the challenges the feminist movement faces today and puts forward a new policy agenda for women Congressional Record United States. Congress,2004 Abortion, Motherhood, and Mental Health Ellie Lee, Whatever reproductive choices women make whether they opt to end a pregnancy through abortion or continue to term and give birth they are considered to be at risk of suffering serious mental health problems According to opponents of abortion in

the United States potential injury to women is a major reason why people should consider abortion a problem On the other hand becoming a mother can also be considered a big risk This fine well balanced book is about how people represent the results of reproductive choices It examines how and why pregnancy and its various outcomes have come to be discussed this way The author s interest in the medicalization of reproduction its representation as a mental health problem first arose in relation to abortion There is a very clear contrast between the construction of women who have abortions implied by moralized argument against abortion and the construction that results when the case against abortion focuses on its effects on women s mental health Lee argues that claims that connect abortion with mental illness have been limited in their influence but this is not to suggest that they have not become a focus for discussion and have had no impact The limits to such claims about abortion do not by any means suggest limits to the process of the medicalization of pregnancy more broadly that is a process of demedicalization The final theme of Ellie Lee s book is the selective medicalization of reproduction Centering on the claim that abortion can create a post abortion syndrome the author examines the medicalization of the abortion problem on both sides of the Atlantic Lee points to contrasts in legal and medical dimensions of the abortion issue that make for some important differences but argues that in both the United States and Great Britain the post abortion syndrome claim constitutes an example of the limits to medicalization and the return to the theme of motherhood as a psychological ordeal Lee makes the case for looking to the social dimensions of mental health problems to account for and understand debates about what makes women ill Ellie Lee is research fellow in the Department of Sociology and Social Policy University of Southampton Highfield United Kingdom
