

Solve the following word problems. Show your solutions then simplify your answers. The first one is done for you.

A jar contains 69 candies, of which 15 are flavoured strawberries, 21 are blueberries, and the rest are mixed berries. What is the ratio of blueberries to mixed berries?

**SOLUTION:** strawberries = 15      blueberries:mixed berries  
blueberries = 21      21:33  
all candies = 69      Simplify 21:33  
mixed berries =  $69 - 15 - 21 = 33$        $21/3 = 7$ ,  $33/3 = 11$       **ANSWER =** 7:11  
7:11

There are 270 people at a sports festival, of which 225 are students, 23 are teachers and the rest are vendors. What is the ratio of vendors to the total people at the festival?

**SOLUTION:** students = 225      vendors:total  
teachers = 23      22:270  
total = 270      Simplify 22:270  
vendors =  $270 - 225 - 23 = 22$        $22/2 = 11$ ,  $270/2 = 135$       **ANSWER =** 11:135  
11:135

Tristan spent a total of \$200 for a date night. He paid \$40 for the movie tickets, \$130 for dinner, and the rest for transportation. What is the ratio of money spent for dinner to transportation?

**SOLUTION:** total = \$200      dinner:transportation  
movie tickets = \$40      130:30  
dinner = \$130      Simplify 130:30  
transportation =  $200 - 40 - 130 = 30$        $130/10 = 13$ ,  $30/10 = 3$       **ANSWER =** 13:3  
13:3

Heather collected 46 cans of tuna, 50 packs of noodles, and 32 bottles of milk for a charity event. What is the ratio of bottled milk to all the goods she collected?

**SOLUTION:** tuna = 46      milk:all goods  
noodles = 50      32:128  
milk = 32      Simplify 32:128  
all goods =  $46 + 50 + 32 = 128$        $32/32 = 1$ ,  $128/32 = 4$       **ANSWER =** 1:4  
1:4

An art club has 75 members, of which 24 are photographers, 26 are film makers, and the rest are painters. What is the ratio of painters to all the members?

**SOLUTION:** all members = 75      painters:all members  
photographers = 24      25:75  
film makers = 26      Simplify 25:75  
painters =  $75 - 24 - 26 = 25$        $25/25 = 1$ ,  $75/25 = 3$       **ANSWER =** 1:3

**Cognitive Processes in Individual and Collective Creativity: A Cross-Cultural Perspective** Chang Liu, Linden John Ball, Haiying Long, Wangbing Shen, 2019-12-30 Creativity the highest level of human wisdom has become an increasingly important concept in different fields of psychological enquiry particularly because it is portrayed as contributing to many aspects of society including personal development economic prosperity and technological advancement However although considerable research attention from a wide range of disciplinary backgrounds has focused on trying to understand creativity the specific nature of creativity its theoretical underpinnings and cognitive mechanisms remain unclear not least when it comes to the understanding of creativity at the individual level and creativity at the collective level On the one hand there are crucial distinctions between individual and collective creativity On the other hand the process of being creative involves not only independent or individual efforts but also interdependent or collective efforts Understanding these differences and interrelationships is crucially important in studies of creativity In this Research Topic we bring together research from a wide variety of cognitive and psychological approaches and perspectives in order to provide a comprehensive and in depth understanding of creativity at both the individual and collective levels Furthermore cognitive mechanisms in the creativity process are unavoidably affected by sociocultural factors and these mechanisms look different across cultures particularly between Eastern cultures and Western cultures two worlds that often imply dramatically dissimilar values and perspectives Despite the fact that many studies have compared and contrasted these two cultures in various respects little research has focused on the specific topic of cultural variation in creative cognition In addition very few studies have examined the differences in the cognitive mechanisms underpinning the cultural variations that can be observed at a surface level This Research Topic aims to fill this gap in the literature and examine the cognitive processes and mechanisms in the creativity process at both individual and collective levels across different cultures by using theoretical and empirical evidence

**Mathematical Problem Solving** ALAN H. SCHOENFELD, 2014-06-28 This book is addressed to people with research interests in the nature of mathematical thinking at any level to people with an interest in higher order thinking skills in any domain and to all mathematics teachers The focal point of the book is a framework for the analysis of complex problem solving behavior That framework is presented in Part One which consists of Chapters 1 through 5 It describes four qualitatively different aspects of complex intellectual activity cognitive resources the body of facts and procedures at one's disposal heuristics rules of thumb for making progress in difficult situations control having to do with the efficiency with which individuals utilize the knowledge at their disposal and belief systems one's perspectives regarding the nature of a discipline and how one goes about working in it Part Two of the book consisting of Chapters 6 through 10 presents a series of empirical studies that flesh out the analytical framework These studies document the ways that competent problem solvers make the most of the knowledge at their disposal They include observations of students

indicating some typical roadblocks to success Data taken from students before and after a series of intensive problem solving courses document the kinds of learning that can result from carefully designed instruction Finally observations made in typical high school classrooms serve to indicate some of the sources of students often counterproductive mathematical behavior

**Concept Mapping in Mathematics** Karoline Afamasaga-Fuata'i, 2009-04-21 Concept Mapping in Mathematics Research into Practice is the first comprehensive book on concept mapping in mathematics It provides the reader with an understanding of how the meta cognitive tool namely hierarchical concept maps and the process of concept mapping can be used innovatively and strategically to improve planning teaching learning and assessment at different educational levels This collection of research articles examines the usefulness of concept maps in the educational setting with applications and examples ranging from primary grade classrooms through secondary mathematics to pre service teacher education undergraduate mathematics and post graduate mathematics education A second meta cognitive tool called vee diagrams is also critically examined by two authors particularly its value in improving mathematical problem solving Thematically the book flows from a historical development overview of concept mapping in the sciences to applications of concept mapping in mathematics by teachers and pre service teachers as a means of analyzing mathematics topics planning for instruction and designing assessment tasks including applications by school and university students as learning and review tools This book provides case studies and resources that have been field tested with school and university students alike The findings presented have implications for enriching mathematics learning and making problem solving more accessible and meaningful for students The theoretical underpinnings of concept mapping and of the studies in the book include Ausubel's cognitive theory of meaningful learning constructivist and Vygotskian psychology to name a few There is evidence particularly from international studies such as PISA and TIMSS and mathematics education research which suggest that students mathematical literacy and problem solving skills can be enhanced through students collaborating and interacting as they work discuss and communicate mathematically This book proposes the meta cognitive strategy of concept mapping as one viable means of promoting communicating and explicating students mathematical thinking and reasoning publicly in a social setting e.g. mathematics classrooms as they engage in mathematical dialogues and discussions Concept Mapping in Mathematics Research into Practice is of interest to researchers graduate students teacher educators and professionals in mathematics education

**The Psychology of Problem Solving** Janet E. Davidson, Robert J. Sternberg, 2003-06-09 Problems are a central part of human life The Psychology of Problem Solving organizes in one volume much of what psychologists know about problem solving and the factors that contribute to its success or failure There are chapters by leading experts in this field including Miriam Bassok Randall Engle Anders Ericsson Arthur Graesser Keith Stanovich Norbert Schwarz and Barry Zimmerman among others The Psychology of Problem Solving is divided into four parts Following an introduction that reviews the nature of problems and the history and methods of the field Part II focuses on individual

differences in and the influence of the abilities and skills that humans bring to problem situations Part III examines motivational and emotional states and cognitive strategies that influence problem solving performance while Part IV summarizes and integrates the various views of problem solving proposed in the preceding chapters     *SAT 2017 Strategies, Practice & Review with 3 Practice Tests* Kaplan Test Prep, 2016-06-21 Now that the College Board's new SAT is in effect you can face the redesigned test with confidence using SAT 2017 Strategies Practice Review This essential guide provides brand new practice tests clear explanations of test changes detailed concept review and much more SAT 2017 Strategies Practice Review is the ideal prep tool for students looking to ace the redesigned test SAT 2017 Strategies Practice Review includes 3 realistic practice tests for the new SAT 1 in the book 2 online In depth review of the new Evidence Based Reading and Writing section and the new Optional Essay In depth review of all Math topics tested in the new SAT including analysis of data charts and graphs Scoring analysis and explanations for 1 official SAT Practice Test Explanations of the new SAT scoring systems including Area Scores Test Scores Cross Test Scores and Subscores Hundreds of practice questions with clear detailed answers The SAT guide you want to prep with to score higher we guarantee a higher score
