Road traffic accident (RTA) injuries and mortalities are some side effects of using automobile vehicles and Ghana is not deprived of them. This study enlightens some effects of road traffic accident mortalities on the Ghanaian economy and investigates its yearly trend, age range distribution and also reveals its influence on economic activities. 832 secondary data obtained on individuals who died through RTA from the Autopsy day book of Pathology Unit, KATH was studied. 15% (126) of the victims were children below 15 years (≤14), 9% (78) are aged over 64 (≥65) years. The total RTA deaths among these two economic dependent age range (≤14 + ≥65) was 25% (204) and that of the economic active population (15-64) is 75%(628). Yearly trend plot shows fluctuations as the working group lies above the dependent population. There is 3:1 death ratio between the economic independent and dependent population respectively, contributing to high dependency ratio in Ghana. Support from the working group towards their families, society and any other dependent population decreases. Economic growth, development and GDP are negatively affected as tax revenue and productivity is comparatively decreasing. The Motor Transport and Traffic Unit should increase its effort to ensure discipline on roads.

Key words: Road traffic accident, active/working population, dependency ratio, mortality, economy.

INTRODUCTION

Collision of vehicles against each other and other objects on motorways and roads has been one of the leading causes of deaths and loss of resources. These various forms of road traffic accidents affect individuals and societies all over the world (Coleman, 2014). Some of the indicators contributing to most RTAs in Ghana include indiscipline behaviors of road users (drivers on phone,

pedestrians crossing road at wrong places), poor road network (Amedorhe and Nsoh, 2016), driving under the influence of alcohol and bad vehicle conditions (Coleman, 2014). Having unlicensed and minors driving on our roads, drivers driving long distance without rest and chronically-ill (visually impaired) drivers are factors contributing to road traffic accidents. Over 65% of

Rta Economic Analysis Manual:

Economic analysis manual, version 2, 1999 **Infrastructure Planning** James V. Parkin, Deepak Sharma, 1999-07

This book introduces engineers to the principles and procedures necessary for infrastructure planning in rapidly developing regions. It covers the technical methods required in planning for infrastructure provision from base line studies and problem definition through to the specification for a set of projects. The book also discusses the political factors that affect the decision making process and demonstrates through case studies how the technical and political perspectives come together in the finished plan. Manual of Process Economic Evaluation Alain Chauvel, Gilles Fournier, Claude Raimbault, 2003

This volume will enable the reader to successfully undertake pre project evaluations especially in the areas of refining and petrochemistry. It encompasses all the essential steps: market analysis, comparative studies of technical and economic issues, sensitivity studies, sizing and costing of the equipment required for an industrial scale plant, estimation of capital spending, calculation of costs and sales prices etc. The first edition of this manual proved to be a very valuable teaching tool for universities and advanced engineering and business schools both in France and abroad. It is essential for the rapid evaluation of the cost and profitability of proposed plants and of those already in operation. It has been widely used by engineers, consulting firms and corporate research and development departments. Its status as the only current publication that covers all the steps involved in the economic evaluation of projects will render it particularly valuable to its users. It will quickly become indispensable to everyone whose job it is to evaluate the economic impact of the development, cancellation or reorientation of a project.

Digital technologies have made it increasingly feasible for buyers and sellers to place and receive orders on a global scale. They also enable the instantaneous remote delivery of services directly into businesses and homes including internationally. The Handbook on Measuring Digital Trade sets out a conceptual and measurement framework for digital trade that aligns with the broader standards for macroeconomic statistics. It aims to help statistical compilers to address policymakers' needs for statistical evidence on digital trade. It includes extensive compilation guidance drawing upon substantive inputs and case studies from both developed and developing economies and covering a variety of survey and non survey sources. This second edition of the Handbook builds upon the concepts set out in the first edition published in 2019. Focusing on cross border digitally ordered goods and services, on digitally delivered services and on the role played by digital intermediation platforms, the Handbook provides a framework and template for the compilation of internationally comparable statistics on digital trade. **The**

Regional Integration Manual Philippe De Lombaerde, Renato Flores, Lelio Iapadre, Michael Schulz, 2012-03-29 The Regional Integration Manual brings together different methods for monitoring and analysing regional integration processes in a systematic way Employing a multi disciplinary approach it seeks to provide officials in regional organisations researchers in think tanks academics and students worldwide with an accessible set of both quantitative and qualitative tools useful in their day to day work The Manual addresses an increasing demand for such tools in a world where mechanisms and ideas for effective regional government and governance are in dire need whereas the monitoring and analytical capabilities of official and non governmental actors often lag behind It also addresses a rapidly growing academic community studying the determinants depth speed and other characteristics of regional integration and co operation Employing a multi disciplinary approach The Regional Integration Manual will be of interest to scholars of governance and regional politics as well as policy makers and those in regional organisations

Urban Congestion, 1995 This paper provides an account of preliminary work on urban traffic congestion that forms part of the Bureau of Transport and Communications Economics project on Urban Transport Externalities The project is concerned with a range of external impacts of urban transport Congestion is just one of these impacts but because it is so intimately related to the traffic patterns which give rise to the others it has been made the focus of the initial work The project is concerned with impacts in Melbourne Sydney Brisbane Adelaide and Perth However mainly for reasons of immediate data availability Melbourne is the subject of this paper It is anticipated that the approach used here will be applied to the other cities as data become available Urban travel behaviour is very complex Analysts have tried to capture its main features in models that provide estimates of the levels and patterns of traffic on the urban road network While the models are complex they are still radical simplifications of real urban systems and their treatment of some aspects of travel behaviour can only be described as rudimentary Nevertheless they constitute the state of the art in quantitative urban transport analysis and they provide a valuable framework for thinking about urban policy issues The paper provides an overview of the general features of urban transport models together with estimates of the level and distribution of delay due to congestion on the urban road network and of the level of optimal congestion tolls
