Variable Renewable Energy and the Electricity Grid Jay Apt,Paulina Jaramillo,2014-06-13 The integration of renewable energy resources into the electricity grid presents an important challenge This book provides a review and analysis of the technical and policy options available for managing variable energy resources such as wind and solar power As well as being of value to government and industry policy makers and planners the volume also provides a single source for

scientists and engineers of the technical knowledge gained during the 4 year RenewElec renewable electricity project at Carnegie Mellon University the University of Vermont Vermont Law School and the Van Ness Feldman environmental law firm The first part of the book discusses the options for large scale integration of variable electric power generation including issues of predictability variability and efficiency The second part presents the scientific findings of the project In the final part the authors undertake a critical review of major quantitative regional and national wind integration studies in the United States Based on comparisons among these studies they suggest areas where improvements in methods are warranted in future studies areas where additional research is needed to facilitate future improvements in wind integration studies and how the research can be put into practice Towards Sustainable Road Transport Ronald M. Dell, Patrick T. Moseley, David A. J. Rand, 2014-06-11 Increasing pressure on global reserves of petroleum at a time of growing demand for personal transport in developing countries together with concerns over atmospheric pollution and carbon dioxide emissions are leading to a requirement for more sustainable forms of road transport Major improvements in the efficiency of all types of road vehicles are called for along with the use of fuels derived from alternative sources or entirely new fuels Towards Sustainable Road Transport first describes the evolution of vehicle designs and propulsion technologies over the past two centuries before looking forward to possible new forms of energy to substitute for petroleum The book also discusses the political and socio economic drivers for change investigates barriers to their broad implementation and outlines the state of the art of candidate power sources advanced vehicle design and associated infrastructure The comprehensive technical information supplied by an expert author team ensures that Towards Sustainable Road Transport will provide readers with a clear understanding of the ongoing progress in this field and the challenges still to be faced Drivers of technological change in road transport and the infrastructure requirements Discussion of alternative fuels for internal combustion engines and fuel conversion technologies Detailed exploration of current and emerging options for vehicle propulsion with emphasis on hybrid battery electric traction hydrogen and fuel cells Comparative analysis of vehicle design requirements primary power source efficiency and energy storage systems *Minicars, Maglevs, and Mopeds* Selima Sultana, Joe Weber, 2016-04-18 This book provides a fascinating look at the amazing diversity of forms of travel and transport around the world today in the context of cultures politics economics and environment of a place Across the timeline of human history transportation has played a role in the migration of people and information nation building economic development environmental alteration access to and the use of resources and even the fall of civilizations This single volume reference presents more than 150 entries that describe the most up to date surface transport technologies and routes in use on every continent including a broad range of road vehicles railroads person powered vehicles and even animals used for transportation The book melds transportation geography with culture politics economics and environment of place in its coverage of vehicles transportation technologies and some of the most famous streets rail systems and highways from around the world The entries are written by transport
