supervision is key to the success of a country's AML CFT system. In this regard, field work in both developed and developing countries has shown an overall low compliance in the area of supervision of banks and other financial institutions. Supervisory compliance is indeed generally lower than the average level of compliance with all Financial Action Task Force recommendations. As a result, by providing examples of good practices, this book aims to help countries better conform to international standards. In this regard, this handbook is specifically designed for bank supervisors.
