Rood, 2016-04-09 This book demystifies the models we use to simulate present and future climates allowing readers to better understand how to use climate model results In order to predict the future trajectory of the Earth's climate climate system simulation models are necessary When and how do we trust climate model predictions The book offers a framework for answering this question It provides readers with a basic primer on climate and climate change and offers non technical explanations for how climate models are constructed why they are uncertain and what level of confidence we should place in them It presents current results and the key uncertainties concerning them Uncertainty is not a weakness but understanding uncertainty is a strength and a key part of using any model including climate models Case studies of how climate model output has been used and how it might be used in the future are provided The ultimate goal of this book is to promote a better understanding of the structure and uncertainties of climate models among users including scientists engineers and policymakers **Perceptual Computing** Jerry Mendel, Dongrui Wu, 2010-07-16 Explains for the first time how computing with words can aid in making subjective judgments Lotfi Zadeh the father of fuzzy logic coined the phrase computing with words CWW to describe a methodology in which the objects of computation are words and propositions drawn from a natural language Perceptual Computing explains how to implement CWW to aid in the important area of making subjective judgments using a methodology that leads to an interactive device a Perceptual Computer that propagates random and linguistic uncertainties into the subjective judgment in a way that can be modeled and observed by the judgment maker This book focuses on the three components of a Perceptual Computer encoder CWW engines and decoder and then provides detailed applications for each It uses interval type 2 fuzzy sets IT2 FSs and fuzzy logic as the

mathematical vehicle for perceptual computing because such fuzzy sets can model first order linguistic uncertainties whereas the usual kind of fuzzy sets cannot Drawing upon the work on subjective judgments that Jerry Mendel and his students completed over the past decade Perceptual Computing shows readers how to Map word data with its inherent uncertainties into an IT2 FS that captures these uncertainties Use uncertainty measures to quantify linguistic uncertainties Compare IT2 FSs by using similarity and rank Compute the subsethood of one IT2 FS in another such set Aggregate disparate data ranging from numbers to uniformly weighted intervals to nonuniformly weighted intervals to words Aggregate multiple fired IF THEN rules so that the integrity of word IT2 FS models is preserved Free MATLAB based software is also available online so readers can apply the methodology of perceptual computing immediately and even try to improve upon it Perceptual Computing is an important go to for researchers and students in the fields of artificial intelligence and fuzzy logic as well as for operations researchers decision makers psychologists computer scientists and computational intelligence experts Remote Sensing of Atmospheric Conditions for Wind Energy Applications Charlotte Bay Hasager, Mikael Sjöholm, 2019-05-24 This Special Issue Atmospheric Conditions for Wind Energy Applications hosts papers on aspects of remote sensing for atmospheric conditions for wind energy applications Wind lidar technology is presented from a theoretical view on the coherent focused Doppler lidar principles Furthermore wind lidar for applied use for wind turbine control wind farm wake and gust characterizations is presented as well as methods to reduce uncertainty when using lidar in complex terrain Wind lidar observations are used to validate numerical model results Wind Doppler lidar mounted on aircraft used for observing winds in hurricane conditions and Doppler radar on the ground used for very short term wind forecasting are presented For the offshore environment floating lidar data processing is presented as well as an experiment with wind profiling lidar on a ferry for model validation Assessments of wind resources in the coastal zone using wind profiling lidar and global wind maps using satellite data are presented The Wiley Handbook of Art Therapy David E. Gussak, Marcia L. Rosal, 2015-10-19 The Wiley Handbook of Art Therapy is a collection of original internationally diverse essays that provides unsurpassed breadth and depth of coverage of the subject The most comprehensive art therapy book in the field exploring a wide range of themes A unique collection of the current and innovative clinical theoretical and research approaches in the field Cutting edge in its content the handbook includes the very latest trends in the subject and in depth accounts of the advances in the art therapy arena Edited by two highly renowned and respected academics in the field with a stellar list of global contributors including Judy Rubin Vija Lusebrink Selma Ciornai Maria d Ella and Jill Westwood Part of the Wiley Handbooks in Clinical Psychology series Engineering Biostatistics Brani Vidakovic, 2017-10-17 Provides a one stop resource for engineers learning biostatistics using MATLAB and WinBUGS Through its scope and depth of coverage this book addresses the needs of the vibrant and rapidly growing bio oriented engineering fields while implementing software packages that are familiar to engineers The book is heavily oriented to computation and hands on approaches so readers

understand each step of the programming Another dimension of this book is in parallel coverage of both Bayesian and frequentist approaches to statistical inference It avoids taking sides on the classical vs Bayesian paradigms and many examples in this book are solved using both methods. The results are then compared and commented upon Readers have the choice of MATLAB for classical data analysis and WinBUGS OpenBUGS for Bayesian data analysis. Every chapter starts with a box highlighting what is covered in that chapter and ends with exercises a list of software scripts datasets and references. Engineering Biostatistics An Introduction using MATLAB and WinBUGS also includes parallel coverage of classical and Bayesian approaches where appropriate substantial coverage of Bayesian approaches to statistical inference material that has been classroom tested in an introductory statistics course in bioengineering over several years exercises at the end of each chapter and an accompanying website with full solutions and hints to some exercises as well as additional materials and examples Engineering Biostatistics An Introduction using MATLAB and WinBUGS can serve as a textbook for introductory to intermediate applied statistics courses as well as a useful reference for engineers interested in biostatistical approaches
