McLeod,Verna M. Adams,2012-12-06 Research on cognitive aspects of mathematical problem solving has made great progress in recent years but the relationship of affective factors to problem solving performance has been a neglected research area The purpose of Affect and Mathematical Problem Solving A New Perspective is to show how the theories and methods of cognitive science can be extended to include the role of affect in mathematical problem solving The book presents Mandler s theory of emotion and explores its implications for the learning and teaching of mathematical problem solving Also leading researchers from mathematics education and psychology report how they have integrated affect into their own cognitive research The studies focus on metacognitive processes aesthetic influences on expert problem solvers teacher decision making technology and teaching problem solving and beliefs about mathematics The results suggest how emotional factors like anxiety frustration joy and satisfaction can help or hinder performance in problem solving *Guide to Math Materials* Phyllis J. Perry,1997-02-15 Now it s easy to locate the materials you need to implement the new NCTM math standards Organized by such math topics as problem solving estimation number sense and numeration and geometry and spatial relationships this book shows users where to find manipulatives and materials such as attribute blocks pattern blocks clocks scales multilink cubes and prisms calculators and sorting toys It also lists specialized math books computer software and a host of other learning materials e g activity cards puzzles posters games reproducibles The author briefly describes each product cites grade level when given and explains possible applications Products of exceptional quality and value are highlighted and the addresses of publishers and suppliers are given A real time saver Grades K 4 **Math Problem Solving for Grades 4 Through 8** James L. Matos,Domingos Fernandes,2013-06-29 A strong and fluent competency in mathematics is a necessary condition for scientific

technological and economic progress However it is widely recognized that problem solving reasoning and thinking processes are critical areas in which students performance lags far behind what should be expected and desired Mathematics is indeed an important subject but is also important to be able to use it in extra mathematical contexts Thinking strictly in terms of mathematics or thinking in terms of its relations with the real world involve quite different processes and issues This book includes the revised papers presented at the NATO ARW Information Technology and Mathematical Problem Solving Research held in April 1991 in Viana do Castelo Portugal which focused on the implications of computerized learning environments and cognitive psychology research for these mathematical activities In recent years several committees professional associations and distinguished individuals throughout the world have put forward proposals to renew mathematics curricula all emphasizing the importance of problem solving In order to be successful these reforming intentions require a theory driven research base But mathematics problem solving may be considered a chaotic field in which progress has been quite slow
