6.3. Step Functions

1. Find the Laplace transform of the following functions.

(a) $f(t) = (t + 3)u_7(t)$

(b) $f(t) = t^2 u_3(t)$

(c) $f(t) = \begin{cases} 1, & 0 \leq t < 2 \\ t^2 - 4t + 4, & t \geq 2 \end{cases}$

(d) $f(t) = \begin{cases} t, & 0 \leq t < 3 \\ 5, & t \geq 3 \end{cases}$

(e) $f(t) = \begin{cases} 0, & t < \pi \\ t - \pi, & \pi \leq t < 2\pi \\ 0, & t \geq 2\pi \end{cases}$

(f) $f(t) = \begin{cases} \cos(\pi t), & t < 4 \\ 0, & t \geq 4 \end{cases}$

(g) $f(t) = \begin{cases} t, & 0 \leq t < 1 \\ e^t, & t \geq 1 \end{cases}$

2. Find the inverse Laplace transform:

(a) $F(s) = \frac{e^{-3s}}{s-2}$

(b) $F(s) = \frac{1+e^{-3s}}{s^2+6}$

(c) $F(s) = \frac{3}{s} + \frac{4}{s^2} + \frac{5s}{s^2+9} - e^{-2s} \left(\frac{3}{s} + \frac{4}{s^2} + \frac{5s}{s^2+9} \right)$

6.4. Solutions of IVP with Discontinuous Forcing Functions

3. Suppose that the function $y(t)$ satisfies the DE $y'' - 2y' - 8y = f(t)$, with $f(t) = \begin{cases} \sin(\pi t), & 0 \leq t < 1 \\ 0, & t \geq 1 \end{cases}$ and initial values $y(0) = -1$, $y'(0) = 3$. Find the Laplace transform of $y(t)$.

4. Consider the following IVP: $y'' + 16y = 2 - 2u_3(t)$, $y(0) = 0$, $y'(0) = 0$.

(a) Find the Laplace transform of the solution $y(t)$.

(b) Find the solution $y(t)$ by inverting the transform.

6.5. Impulse Functions

5. A mass $m = 1$ is attached to a spring with constant $k = 5$ and damping constant $c = 2$. At the instant $t = \pi$, the mass is struck with a hammer, providing an impulse $p = 10$. Also, $x(0) = 0$ and $x'(0) = 0$.

a) Write the differential equation governing the motion of the mass.

b) Find the Laplace transform of the solution $x(t)$.

c) Apply the inverse Laplace transform to find the solution.

6. Consider the following IVP: $y'' + 4y = 5\delta(t - 3)$, $y(0) = 1$, $y'(0) = 2$.

(a) Find the Laplace transform of the solution $y(t)$.

(b) Find the solution $y(t)$ by inverting the transform.

Introduction to the Thermodynamics of Materials David R. Gaskell, David E. Laughlin, 2017-08-15 Maintaining the substance that made Introduction to the Thermodynamic of Materials a perennial best seller for decades this Sixth Edition is updated to reflect the broadening field of materials science and engineering The new edition is reorganized into three major sections to align the book for practical coursework with the first Thermodynamic Principles and second Phase Equilibria sections aimed at use in a one semester undergraduate course The third section Reactions and Transformations can be used in other courses of the curriculum that deal with oxidation energy and phase transformations The book is updated to include the role of work terms other than PV work e g magnetic work along with their attendant aspects of entropy Maxwell equations and the role of such applied fields on phase diagrams There is also an increased emphasis on the thermodynamics of phase transformations and the Sixth Edition features an entirely new chapter 15 that links specific thermodynamic applications to the study of phase transformations The book also features more than 50 new end of chapter problems and more than 50 new figures

Herschel Prins, 2002-01-04 Focus in the

media on the risks posed to ordinary people has become increasingly strong in recent years particularly on those risks popularly perceived to be posed by the mentally ill But how justified is this concern How do we best manage so called dangerous people In Will They Do It Again Herschel Prins considers the issue of public protection within a broad context of risk in society generally examining the concerns arising in contemporary society from dealing with uncertainty It is argued that public fear over the danger posed by the mentally ill is at odds with the evidence and that much of the concern is focused on a small number of high profile cases Prins goes on to examine such cases where management of the mentally ill has failed and sets out suggestions for improvements in practice Will They Do It Again cuts through popular misunderstanding and media hype over risk to give a clear unbiased picture of the real risks to society from the mentally ill and how best they can be contained and managed and will prove invaluable to a range of practitioners involved in the fields of criminal justice and psychiatry **The Illustrated London News** ,1874 **Genomics and Society** Martin W.

Defining an Identity P.J. Fensham, 2012-12-06 Research in science education is now an international activity This book asks for the first time Does this research activity have an identity It uses the significant studies of more than 75 researchers in 15 countries to see to what extent they provide evidence for an identity as a distinctive field of research It considers trends in the research over time and looks particularly at what progression in the research entails It provides insight into how researchers influence each other and how involvement in research affects the being of the researcher as a person It addresses the relation between research and practice in a manner that sees teaching and learning in the science classroom as interdependent with national policies and curriculum traditions about science It gives graduate students and other early researchers an unusual overview of their research area as a whole Established researchers will be interested in and challenged by the identity the author ascribes to the research and by the plea he makes for the science content itself to be seen as problematic

The Woman Question: Literary issues Elizabeth K. Helsinger,1983 **Delivery of Goods under Bills of Lading** Anders Møllmann,2016-12-01 Probably the core characteristic of a bill of lading is that the original bill of lading must be presented at the port of destination for a consignee to be entitled to delivery of the goods and for the carrier to get a good discharge of its delivery obligation by delivering the goods to said consignee This notion is accepted virtually worldwide but the more precise content of the presentation rule differs from jurisdiction to jurisdiction Furthermore and of importance the legal basis establishing the presentation rule differs With the technological advances in maritime transport as well as in communications technology and the emergence of more complicated trading patterns a system where a specific tangible piece of paper issued at the port of loading has to be presented at the port of discharge to obtain delivery of the goods seems almost archaic and can obviously create problems Thus in practice very often especially in some trades such as the oil trade the bill of lading is not available at the port of discharge when the ship is ready to deliver the cargo The book will first analyse the presentation rule its finer contents and its legal basis It will then go on with legal analyses of three developments and responses to the problems that the bill of lading system gives rise to in practice viz the commercial the international legislature s and the technological response The commercial response analysed here consists of contractual exemption or limitation clauses in the bill of lading set up as a defence against claims for misdelivery The international legislature s response denotes the adoption of the Rotterdam Rules which as the first international convention on carriage of goods by sea includes elaborate rules on delivery of the goods Finally the technological response denotes the possibility of using electronic equivalents of bills of lading The analyses will include a comparative approach examining both English and Scandinavian law to elucidate the issues with greater clarity Michael Foster and the Cambridge School of Physiology Gerald L.

Geison,2015-03-08 Despite great ferment and activity among historians of science in recent years the history of physiology after 1850 has received little attention Gerald Geison makes an important contribution to our knowledge of this neglected area by investigating the achievements of English physiologists at the Cambridge School from 1870 to 1900 He describes individual scientists their research the scientific issues affecting their work and socio institutional influences on the group He

pays special attention to the personality and contributions of Michael Foster founding father of the Cambridge School Foster's specific research interest was the origin of the rhythmic heartbeat and the author contends that the school itself descended from and developed around this concern Originally published in 1978 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 Moral Taste Marjorie Garson, Associate Professor of English Erindale College Marjorie Garson, 2007-01-01 Moral Taste is a study of the ideological work done by the equation of good taste and moral refinement in a selection of nineteenth century writings

Victorian novels Gaskell's *Cranford* Yonge's *The Daisy Chain* Dickens's *Our Mutual Friend* and Oliphant's *Phoebe Junior* Each chapter centers on a scene of craft production that expresses the novel's ideals and also interrogates the novel itself as a form of craft and each chapter highlights an influential craft genre paper crafts pressed flowers knitting and hair jewelry The book closes with a coda on the current resurgent crafts movement of Etsy.com as a fresh version of a Victorian sensibility Featuring illustrations from two centuries of domestic handicraft Schaffer deftly combines cultural history and literary analyses to create a revealing portrait of a neglected part of nineteenth century life and highlights its continuing relevance in today's world of Martha Stewart women's magazine crafts and a rapidly expanding alt craft culture
