Futatsugi, A.T. Nakagawa, T. Tamai, 2000-10-06 This book contains selected papers on the language applications and environments of CafeOBJ which is a state of the art algebraic specification language The authors are speakers at a workshop held in 1998 to commemorate a large industrial academic project dedicated to CafeOBJ The project involved more than 40 people from more than 10 organisations of which 6 are industrial The workshop attracted about 30 talks and more than 70 attendees The papers in the book however are either heavily revised versions presented at the workshop to reflect recent advancements or research or completely new ones written especially for this book In this regard the book is not a usual postpublication after a workshop Also although it is a compendium of papers that are related to CafeOBJ the book is not a manual reference or tutorial of CafeOBJ Probably the best description is that it is a collection of papers that investigate how to use or to make it easy to use CafeOBJ Reflecting the diverse nature of the project and its participants most of the authors are participants to the project the papers put together offer a comprehensive picture from this methodological perspective Some papers deal with various advanced aspects of the language such as rewriting logic and behavioural logic For rewriting logic a couple of significant applications were reported In particular UML now considered de facto standard language for modelling systems is the subject of one paper For behavioural logic new methodological guidelines are presented Some papers shed new light on a more traditional paradigm in the language order sorted equational specifications One paper in particular deal with a way to associate CafeOBJ with object oriented programming The other papers deal with environments for writing and verifying specifications written in CafeOBJ Underlying those papers are two major considerations user interfaces for manipulating specifications and systematic supports for proofs All the environments explained in the papers assume and support distributed computing and de facto standard network technologies such as WWW and http are incorporated **Craft Coffee: A Manual** Jessica Easto, 2017-11-14 Named a top food drink book of 2017 by Food Network Wired Sprudge and Booklist This comprehensive but accessible handbook is for the average coffee lover who wants to make better coffee at home Unlike other coffee books this one focuses exclusively on coffee not espresso and explores multiple pour over immersion and cold brew techniques on 10 different devices Thanks to a small but growing number of dedicated farmers importers roasters and baristas coffee quality is at an all time high But for nonprofessionals achieving caf quality at home can seem out of reach With dozens of equipment options conflicting information on how to use that equipment and an industry language that at times doesn't seem made for the rest of us it can be difficult to know where to begin Craft Coffee A Manual written by a coffee enthusiast for coffee enthusiasts is a comprehensive guide to improving your brew at home The book provides all the information readers need to discover what they like in a cup of specialty coffee and how to replicate the
