- 9) The connection between poverty and obesity.
- 10) Should governments intervene in the obesity problem? If yes, how?

Obesity Research Paper Outline

CL Gary

Obesity Research Paper Outline:

Introduction to Research in the Health Sciences Stephen Polgar, BSc(Hons), MSc, Shane A. Thomas, 2013-09-16 This popular textbook provides a concise but comprehensive overview of health research as an integrated problem solving process. It bridges the gap between health research methods and evidence based clinical practice making it an essential tool for students embarking on research. Practitioners also benefit from guidance on interpreting the ever expanding published research in clinical and scientific journals to ensure their practice is up to date and evidence based and to help patients understand information obtained online. This textbook would be of interest and value both to undergraduate and post graduate students also. Reviewed by Dr Richard Ellis on behalf of the New Zealand Journal of Physiotherapy January 2015 excellent at giving an introduction and overview into research methods. Reviewed by Tobias Bremer on behalf of InTouch July 2015 Uses simple language and demystifies research jargon. Covers both quantitative and qualitative research methodology taking a very practical approach. Gives examples directly related to the health sciences. Each chapter contains a self assessment test so that the reader can be sure they know all the important points. Provides an extensive glossary for better understanding of the language of research. Online interactive self assessment tests. Multiple choice questions. True or false questions. Short answer questions. Log on to evolve.elsevier.com/Polgar/research and register to access the above assets.

Obesity Discourse and Fat Politics Lee Monaghan,Rachel Colls,Bethan Evans,2015-12-22 There is considerable rhetoric and concern about weight and obesity across an increasing range of national contexts Alarmist claims about an obesity time bomb are continually recycled in policy reports reviews and white papers each of which begin with the assumption that fatness is fundamentally unhealthy and damaging to national economies With contributions from the UK Canada the USA and Australia this book offers alternative critical perspectives on this alleged public health crisis which were in part developed through an Economic and Social Research Council seminar series on Fat Studies and Health at Every Size HAES Written by scholars from a range of disciplines and the health professions themes include an interrogation of statistical procedures used to construct the obesity epidemic overweight and obesity as cultural signifiers for Type 2 diabetes understandings of healthy eating and healthy weight in a problem population gendered expectations on men and women to lose weight the visual representation of obesity tensions when researching anti fatness critical dietitians engagement with

HAES alternative ways of promoting physical activity and representations of obesity in the media This book was originally published as a special issue of Critical Public Health *The Impact of New Health Imperatives on Educational Policy and Schooling* Jan Wright, Valerie Harwood, 2016-02-05 Currently a great deal of public discourse around health is on the assumed relationship between childhood inactivity young people's diets and a putative steep rise in obesity Children and young people are increasingly being identified as a population at risk in relation to these health concerns Such concerns are driving what might be described as new health imperatives which prescribe the choices young people should make around lifestyle physical activity body regulation dietary habits and sedentary behaviour These health imperatives are a powerful force driving major policy initiatives on health and education in a number of countries in the Western world Schools in particular have been targeted for the implementation of a plethora of initiatives designed to help children and young people lose weight become more active and change their eating patterns inside and outside school Addressing these issues requires an innovative theoretical approach Neither the fields of eating disorders nor obesity research has addressed these issues from a sociological and pedagogical perspective The contributors to this edited collection draw on a range of social theories including Michel Foucault and Basil Bernstein to interpret the data collected across three countries Australia and New Zealand United Kingdom and from a range of primary and secondary schools Each chapter addresses various aspects of the relationship between health imperatives as constituted in government policies school programs and practices their recontextualised in school practices and the impact of this on the subjectivities of children and teachers This book was originally published as a special issue of Discourse Studies in the Cultural Politics of Education
