

Basics of Riding Motorcycle

Are you tired of reading guides that go over basic stuff but does not actually tell you how to ride? Mount yourself and get ready to use throttle, clutch and brake. This guide will assist you in your first motorcycle ride. We will directly start with starting your motorcycle, practicing clutch and changing gears.

IMPORTANT :- It is a prerequisite that you have the ability to balance and ride a bicycle. If you have not ridden a bicycle in a few years or have never ridden on, please either refresh your skills by cycling for few minutes or learn to ride a bicycle prior to following this guide.

Before You Mount

Safety

What you will be doing today is take baby steps. It is best if you follow the instruction in an off-street environment: an empty parking lot is perfect; if not, you can practice on a very low traffic road. Protective gear is essential for new motorcycle riders.

Safety gears that you need:

- **Helmet:** Must be USDOT certified for better protection
- **Eye protection:** Optional if your helmet has eye shield or if you wear prescription glasses
- **Jacket:** Or full sleeves shirt for hand and elbow protection
- **Jeans:** For leg protection
- **Boots:** Closed-toe shoes are a must for gear shifting and braking
- **Gloves:** For palm protection

Know your Ride

Get yourself familiar with your motorcycle's controls. Most motorcycles should have controls similar to Fig 1 but if you don't, check the vehicle's manual for more details.

Positions of gear are shown in fig 2. **Note:** Any gear 5 onwards will be above 5th gear.
