

QUICK TALK INSTALLATION

WHEN YOU ARE FINISHED PROGRAMMING:

- Hang up and disconnect the telephone from the internal jack on the Quick Talk assembly.
- Test the operation of the Quick Talk before putting it in service. Activate the switch and listen to the message received on your radio.

NOTE: Refer to Figure 3 at right.

- Replace the cover and (4) cover screws; snug down but do not overtighten the screws. Excessive force could break the plastic enclosure material.

Attach and seal the antenna connection.

- a. Insert, rotate and lock the antenna to the Quick Talk antenna jack.
- b. Orient the antenna to a vertical position.
- c. Seal the antenna connection to hold the antenna in its position, protect the antenna fittings, and maintain water-resistance of the Quick Talk in wet or outdoor environments.

Use Archer Connector Sealant, Radio Shack Catalog Number 278-1645 or an equivalent. Wrap the connection with the sealant tape and press it securely in place. See package directions.

- Test for sufficient broadcast range when choosing the location. For maximum range and coverage, install the unit as high off the ground as possible. Be aware that metal or wires near the antenna can block or absorb radio transmissions. Choose a well-shaded location.
- Position the unit as shown, and secure it in place with screws through the enclosure flanges. Do not overtighten these screws. You may break the plastic flanges.

IMPORTANT: Contact a qualified technician or electrician if you are not certain your installation will work properly and safely.

CARE AND MAINTENANCE

Moisture: When the antenna sealant and power cable recommendations are followed, the Quick Talk is weather tight in outdoor environments. Do not immerse the unit in water.

Temperature: The Quick Talk is designed to operate between -22 and +140 degrees Fahrenheit. Like all electronic equipment, Quick Talk should not be subjected to extreme heat. An ideal outdoor location is in a shaded area.

Vibrations/Shocks: Though the Quick Talk is designed to be rugged, it cannot be expected to survive extreme abuse.

Chemicals: Do not use harsh, corrosive or abrasive chemicals to clean the Quick Talk case. Use only a cloth moistened with water. Do not attempt to clean the electronic printed circuit board.

Batteries: Use only fresh, new alkaline batteries when programming Quick Talk. Acceptable brands and types are: Duracell MX1500B, Eveready E91, Rayovac 815 or equivalent. Refer to the Advanced Owner's Manual for information about using rechargeable NiCad AA batteries that are charged by an optional external 12 Volt DC power supply.

Estimated Battery Life: Starting with a fresh set of AA alkaline batteries, the RQT can transmit about 7,000 voice messages over a period of one year before the batteries need replacement.

Automatic Low Battery Alert Message: When the battery voltage drops below about 6 Volts, the Quick Talk begins transmitting a factory prerecorded message saying "Low Batt" every 15 minutes. This is an indication that your batteries should be replaced sometime in the next day or so.
